ISO 6721-6:2019 (E)

Plastics — Determination of dynamic mechanical properties — Part 6: Shear vibration — Non-resonance method

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Apparatus

5.1 Loading assembly
5.1.1 General
5.1.2 Load stage
5.1.3 Transducers
5.2 Electronic data-processing equipment
5.3 Temperature measurement and control
5.4 Devices for measuring test specimen dimensions

6 Test specimens

6.1 General
6.2 Shape and dimensions
6.3 Preparation of polymer specimens

7 Number of test specimens

8 Conditioning

9 Procedure

9.1 Test atmosphere
9.2 Measuring the cross-section of the polymer specimen
9.3 Clamping the test assembly
9.4 Varying the temperature
9.5 Performing the test

10 Expression of results

10.1 Symbols
10.2 Calculation of the shear storage modulus G′
10.2.1 General
10.2.2 Avoidance of test assembly resonance
10.2.3 Correction for transducer resonance
10.2.4 Correction for apparatus compliance
10.3 Calculation of the shear loss factor tan δG
10.4 Calculation of the shear loss modulus
10.5 Presentation of data as a function of temperature

11 Precision

12 Test report
