ISO 15512:2019 (E)

Plastics — Determination of water content

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Method A — Extraction with anhydrous methanol

- 4.1 Principle
- 4.2 Reagents
- 4.3 Apparatus
- 4.4 Preparation of test sample
- 4.4.1 Granules or powder
- 4.4.2 Finished articles
- 4.5 Procedure
- 4.5.1 Precautions
- 4.5.2 Preparation of test portions
- 4.5.3 Determination
- 4.6 Expression of results
- 4.7 Precision

5 Method B1 — Water vaporization using a heating tube oven

- 5.1 Principle
- 5.2 Reagents
- 5.3 Apparatus
- 5.4 Preparation of test sample
- 5.5 Procedure
- 5.5.1 Precautions
- 5.5.2 Preparation of apparatus
- 5.5.3 Equipment checks
- 5.5.4 Determination
- 5.6 Expression of results
- 5.7 Precision

6 Method B2 — Water vaporization using a heated sample vial

- 6.1 Principle
- 6.2 Reagents
- 6.3 Apparatus
- 6.4 Preparation of test sample
- 6.5 Procedure
- 6.5.1 Preparation of apparatus
- 6.5.2 Equipment check
- 6.5.3 Determination
- 6.5.3.1 Sample
- 6.5.3.2 Blank
- 6.6 Expression of results
- 6.7 Precision

7 Method C — Manometric method

- 7.1 Principle
- 7.2 Reagents

7.3 Apparatus
7.4 Preparation of test sample
7.5 Procedure
7.5.1 Equipment
7.5.1.1 General
7.5.1.2 Equipment check
7.5.2 Outgassing
7.5.3 Calibration
7.5.3.1 Equipment setup
7.5.3.2 Water standard preparation — Sodium molybdate dihydrate
7.5.3.3 Water standard preparation — Inorganic substance
7.5.3.4 Calibration factor
7.5.4 Determination
7.6 Expression of results
7.7 Precision

8 Method D — Water detection by using a diphosphorus pentoxide cell

8.1 Principle
8.2 Reagents
8.3 Apparatus
8.4 Preparation of test sample
8.5 Procedure
8.5.1 Preparation of apparatus
8.5.2 Rinsing the system
8.5.3 Tare measurement
8.5.4 Cell factor
8.5.5 Equipment check
8.5.6 Determination
8.5.6.1 Sample
8.6 Expression of results
8.7 Precision

9 Method E — Determination of water content by calcium hydride method

9.1 Principle
9.2 Reagents
9.3 Apparatus
9.4 Preparation of test sample
9.5 Procedure
9.5.1 Equipment check
9.5.2 Calibration
9.5.3 Determination
9.5.4 Expression of results
9.6 Precision

10 Test report

Annex A (informative) Alternative sample preparation methods and titration methods

A.1 General
A.2 Titration in solution
A.3 Continuous titration in suspension
A.4 Discontinuous titration in suspension
A.5 External extraction of water

Annex B (informative) Selection of the optimum heating temperature and heating time for the water content determination

B.1 Procedure for optimum temperature setting
B.2 Interpretation of results
B.3 Optimum heating time setting

Annex C (normative) Determination of the water content of a water standard

Page count: 34
