DIN CEN ISO/TR 21960:2021-02 (E)

Plastics - Environmental aspects - State of knowledge and methodologies (ISO/TR 21960:2020); English version CEN ISO/TR 21960:2020

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 End-use applications of plastic materials and its relevance to the environment ... **4**
4.1 General ... 4
4.2 Packaging ... 8
4.3 Building and construction ... 9
4.4 Mobility and transportation, electrical and electronics ... 9
4.5 Agriculture ... 9

5 Occurrence of plastics in environmental matrix and biota ... **10**
5.1 General ... 10
5.2 Water systems ... 10
5.2.1 Marine waters ... 10
5.2.2 Fresh waters ... 11
5.3 Sediments ... 11
5.3.1 Marine sediments ... 11
5.3.2 Fresh water sediments ... 12
5.4 Sludge ... 12
5.5 Soils ... 13
5.5.1 Terrestrial systems ... 13
5.5.2 Beaches ... 13
5.6 Air ... 14
5.7 Terrestrial fresh water and marine biota ... 14

6 Testing methods ... **15**
6.1 General ... 15
6.2 Sampling ... 15
6.2.1 General ... 15
6.2.2 Water (aquatic systems) ... 16
6.2.3 Sediment, sludge and soil (solid systems) ... 17
6.2.4 Air ... 18
6.2.5 Biota ... 18
6.2.6 Statistical considerations for sampling ... 19
6.3 Sample preparation ... 19
6.3.1 General ... 19
6.3.2 Physical preparation methods ... 20
6.3.3 Chemical preparation methods ... 21
6.3.4 Enzymatic preparation ... 21
6.4 Analysis ... 21
6.4.1 General ... 21
6.4.2 Spectroscopic analysis methods ... 22
6.4.3 Thermo-analytic methods ... 23
6.4.4 Chemical extraction methods ... 23

7 Methodology of entry pathways (Monitoring) 25
8 Basics of environmental assessments 27
9 Recommendations for the development of standards 28
Bibliography 30
