|         |  |
|---------|--|
|         | Foreword   |
|         | Introduction   |
| 1       | Scope  |
| 2       | Normative references                                 |
| 3       | Terms and definitions                                |
| 4       | Principle  |
| 5       | Test environment                                     |
| 6       | Reagents   |
| 7       | Apparatus  |
| 8       | Procedure  |
| 8.1     | Test material  |
| 8.2     | Reference materials                                  |
| 8.3     | Test set up  |
| 8.4     | Pre-conditioning phase                               |
| 8.5     | Start of the test                                    |
| 8.6     | Carbon dioxide measurement                           |
| 8.7     | End of the test                                      |
| 9       | Calculation and expression of results                |
| 9.1     | Calculation  |
| 9.1.1   | Amount of CO <sub>2</sub> produced                   |
| 9.1.1.1 | Net CO <sub>2</sub> produced                         |
| 9.1.1.2 | Ba(OH) <sub>2</sub> used as CO <sub>2</sub> absorber |
| 9.1.1.3 | KOH used as CO <sub>2</sub> absorber                 |
| 9.1.2   | Percentage of biodegradation                         |
| 9.2     | Visual inspection                                    |
| 9.3     | Expression and interpretation of results             |
| 10      | Validity of results                                  |
| 11      | Test report  |
| Annex A | (informative) Example of a respirometric system      |
