

ISO 19935-3:2021 (E)

Plastics — Temperature modulated DSC — Part 3: Separation of overlapping thermal transitions

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Symbols
4.1	Temperature modulation, $T(t)$
4.2	Heating rate
4.3	Heat flow rate, $\Phi(t)$
5	Principles
6	Apparatus and materials
7	Calibration
7.1	General
7.2	Calibration procedure
7.3	Calibration of modulation amplitude
7.4	Calibration of phase
8	Procedure
8.1	General
8.2	Experimental conditions
8.3	Interpretation of results
8.4	Examples of the results — Separation of reversing and non-reversing heat flow rate
9	Test report
Annex A	(informative) Modulated heat flow rate and heating rate of modulation
