ISO 23517:2021-07 (E)

Plastics - Soil biodegradable materials for mulch films for use in agriculture and hor ticulture - Requirements and test methods regarding biodegradation, ecotoxicity and control of constituents

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Basic requirements 3
4.1 General 3
4.2 Control of constituents 3
4.3 Ultimate aerobic biodegradation 4
4.4 Negative effects on terrestrial organism 4

5 Detailed requirements 4
5.1 Control of constituents 4
5.1.1 Regulated metals and other elements 4
5.1.2 Organic and inorganic fluorine 4
5.1.3 Other hazardous substances 4
5.1.4 Volatile solids 4
5.2 Ultimate aerobic biodegradation 5
5.2.1 Test method and evaluation criteria 5
5.2.2 Requirements regarding constituents 5
5.3 Negative effects on terrestrial organism 6
5.3.1 Ecotoxicity testing scheme 6
5.3.2 Preparation of soils for ecotoxicity tests 6
5.3.3 Acute toxicity plant growth test 7
5.3.4 Earthworm test 7
5.3.5 Nitrification inhibition test with soil microorganisms 8

6 Test report 9

Annex A (informative) Examples of maximum concentrations of regulated metals and other elements 10

Annex B (normative) Maximum concentrations of organic and inorganic fluorine and other hazardous substances 11

Annex C (normative) Determination of acute effects of materials on the emergence and growth of higher plants 13

Annex D (normative) Determination of acute effects of materials on earthworms 15

Annex E (normative) Determination of effects on reproduction of earthworms 16

Annex F (normative) Determination of nitrification of soil microorganisms 17

Annex G (normative) Preparation of soils for ecotoxicity testing 18

Annex H (informative) Visual surface evaluation method of the disintegration in a slide frame test 20
