## Plastics - Determination of J-R curves - Fracture toughness

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
1	Scope .....	1
2	Normative references .....	1
3	Terms, definitions and symbols .....	1
3.1	Terms and definitions .....	1
3.2	Symbols .....	4
4	Principle .....	4
5	Apparatus .....	4
5.1	Testing machine .....	4
5.1.1	General .....	4
5.1.2	Test speeds .....	4
5.1.3	Force indicator .....	5
5.2	Displacement transducer .....	5
5.3	Loading rigs .....	5
6	Test specimens .....	6
6.1	General .....	6
6.2	Shape and size .....	6
6.3	Preparation .....	8
6.4	Notching .....	8
7	Procedure .....	9
7.1	General .....	9
7.2	Thickness, width of test specimens .....	9
7.3	Conditioning .....	9
7.4	Test speed .....	9
7.5	Number of specimens .....	9
7.6	Testing procedure .....	9
7.7	Crack length and crack extension measurement .....	10
7.8	Indentation correction .....	11
8	Calculation and interpretation of results .....	11
8.1	General .....	11
8.2	Calculation of J integral .....	12
8.2.1	Estimation of the slope .....	12
8.2.2	Splitting of the total energy, UT .....	12
8.2.3	Calculation of corrected energy .....	13
8.2.4	Calculate J integral .....	13
9	Validation of results .....	13
9.1	General .....	13
9.2	Construction of J-R curves .....	13
10	Test reports .....	14
11	Precision and bias .....	15
11.1	General .....	15
11.2	Splitting of energy .....	15
Annex A (informative) .....		16
Bibliography .....		20
