## Rubber- or plastics-coated fabrics - Measurement of gas permeability

---

| <b>Contents</b>       |   | <b>Page</b> |
|-----------------------|---|-------------|
| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....   | 1           |
| 2                     | Normative references .....                                    | 1           |
| 3                     | Terms and definitions .....                                   | 1           |
| 4                     | Principle .....   | 2           |
| 5                     | Test pieces .....   | 2           |
| 5.1                   | Shape and dimensions .....                                    | 2           |
| 5.2                   | Measurement of thickness .....                                | 2           |
| 5.3                   | Number of test pieces .....                                   | 2           |
| 5.4                   | Sealing and masking .....                                     | 2           |
| 5.5                   | Conditioning .....  | 3           |
| 5.6                   | Test atmosphere .....   | 3           |
| 5.7                   | Gas transmission area .....                                   | 3           |
| 6                     | Pressure sensor method .....                                  | 4           |
| 6.1                   | Apparatus .....   | 4           |
| 6.2                   | Test gas .....  | 5           |
| 6.3                   | Procedure .....   | 5           |
| 6.4                   | Calculation and expression of results .....                   | 7           |
| 6.4.1                 | Gas transmission rate .....                                   | 7           |
| 6.4.2                 | Gas permeability coefficient .....                            | 8           |
| 7                     | Gas chromatography method .....                               | 8           |
| 7.1                   | Apparatus .....   | 8           |
| 7.2                   | Test gas .....  | 9           |
| 7.3                   | Carrier gas .....   | 9           |
| 7.4                   | Calibration curve .....                                       | 10          |
| 7.5                   | Procedure .....   | 10          |
| 7.6                   | Calculation and expression of results .....                   | 11          |
| 7.6.1                 | Gas transmission rate .....                                   | 11          |
| 7.6.2                 | Gas permeability coefficient .....                            | 11          |
| 8                     | Test report .....   | 11          |
| Annex A (informative) | Gas chromatography method with equal pressure condition ..... | 13          |
