## Fibre-reinforced plastic composites - Determination of laminate through-thickness properties - Part 1: Direct tension and compression tests

---

| <b>Contents</b>     |   | <b>Page</b> |
|---------------------|---|-------------|
| <b>Foreword</b>     |   | <b>v</b>    |
| <b>Introduction</b> |   | <b>vi</b>   |
| <b>1</b>            | <b>Scope</b>  | <b>1</b>    |
| <b>2</b>            | <b>Normative references</b>                                   | <b>1</b>    |
| <b>3</b>            | <b>Terms and definitions</b>                                  | <b>2</b>    |
| <b>4</b>            | <b>Principle</b>  | <b>4</b>    |
| <b>5</b>            | <b>Apparatus</b>  | <b>4</b>    |
| 5.1                 | Test machine  | 4           |
| 5.1.1               | General   | 4           |
| 5.1.2               | Indicators for load and strain                                | 5           |
| 5.2                 | Strain gauges and strain acquisition                          | 5           |
| 5.3                 | Micrometer  | 5           |
| 5.4                 | Loading fixtures  | 5           |
| 5.4.1               | General   | 5           |
| 5.4.2               | Method A - Tension loading                                    | 5           |
| 5.4.3               | Method B - Compression loading                                | 5           |
| <b>6</b>            | <b>Test specimens</b>   | <b>6</b>    |
| 6.1                 | Shape and dimensions  | 6           |
| 6.1.1               | Type I specimens  | 6           |
| 6.1.2               | Type II specimens   | 7           |
| 6.1.3               | Type III specimens  | 8           |
| 6.1.4               | Non-standard test specimens                                   | 9           |
| 6.2                 | Preparation of test specimens                                 | 10          |
| 6.2.1               | General   | 10          |
| 6.2.2               | Parallelism   | 10          |
| 6.2.3               | Application of end-loading blocks for Method A — Tension only | 10          |
| 6.3                 | Checking  | 10          |
| <b>7</b>            | <b>Test specimens</b>   | <b>10</b>   |
| <b>8</b>            | <b>Conditioning</b>   | <b>11</b>   |
| <b>9</b>            | <b>Test procedure</b>   | <b>11</b>   |
| 9.1                 | Test atmosphere   | 11          |
| 9.2                 | Specimen dimensions   | 11          |
| 9.3                 | Specimen preparation Method A — Tension only                  | 11          |
| 9.4                 | Strain recording  | 11          |
| 9.5                 | Specimen alignment  | 11          |
| 9.5.1               | Method A - Tension  | 11          |
| 9.5.2               | Method B - Compression  | 12          |
| 9.6                 | Testing speed, $v$  | 12          |
| 9.7                 | Data collection   | 12          |
| 9.8                 | Maximum load  | 12          |
| 9.9                 | Failure mode  | 12          |
| 9.10                | Test acceptance   | 12          |

|   |   |           |
|---|---|-----------|
| <b>10</b>   | <b>Expression of results</b> .....                | <b>12</b> |
| 10.1  | Method A — Tension.....                           | 12        |
| 10.1.1  | Tensile strength.....                             | 12        |
| 10.1.2  | Modulus of elasticity (chord) in tension.....     | 13        |
| 10.1.3  | Tensile failure strain.....                       | 14        |
| 10.2  | Method B — Compression.....                       | 14        |
| 10.2.1  | Compressive strength.....                         | 14        |
| 10.2.2  | Modulus of elasticity (chord) in compression..... | 15        |
| 10.2.3  | Compressive failure strain.....                   | 15        |
| 10.3  | Poisson’s ratio – Methods A and B.....            | 15        |
| 10.4  | Statistical analysis.....                         | 16        |
| <b>11</b>   | <b>Precision</b> .....                            | <b>16</b> |
| <b>12</b>   | <b>Test report</b> .....                          | <b>16</b> |
| <b>Annex A (informative) Precision data</b> ..... |   | <b>17</b> |
| <b>Bibliography</b> .....                         |   | <b>19</b> |
