## Plastics - Determination of burning behaviour of thin flexible vertical specimens in contact with a small flame ignition source

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Principle .....	2
5	Significance of test .....	2
6	Apparatus and materials .....	3
7	Test specimens .....	4
8	Conditioning .....	6
9	Test procedures .....	6
10	Expression of results .....	8
11	Precision .....	9
12	Test report .....	9
Annex A (informative) Classification system for determining the combustibility of vertical flexible test specimens using a 20 mm flame source .....		11
