ISO 20457:2026-08 (E)

Plastics moulded parts - Tolerances and acceptance conditions

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and abbreviated terms 2
4.1 General 2
4.2 Symbols 2
4.3 Abbreviated terms 3

5 Tolerancing of plastic moulded parts 3
5.1 General 3
5.2 Composition of tolerance 6
5.3 Default settings 7
5.4 Direct tolerancing (individual tolerancing) 7
5.5 Draft angles 7
5.6 Dimensioning, tolerancing and measuring of radii 8
5.7 Specification of freeform surfaces 8

6 Description of the technically possible accuracy 8
6.1 Moulding compound properties 8
6.1.1 General 8
6.1.2 Moulding shrinkage and shrinkage anisotropies 8
6.2 Moulded material stiffness or hardness 9

7 Dimensional and geometrical tolerancing 10
7.1 Dimensional tolerancing 10
7.1.1 Tolerance grades for features of sizes 10
7.1.2 Determination of the tolerance grades 13
7.2 Geometrical tolerancing 16
7.3 Parting line/Tool offset 19
7.4 Tolerancing of angular dimensions 19

8 General tolerances 20
8.1 General 20
8.2 Entry of the specification in the technical product documentation 20

9 Acceptance conditions for moulded part production (ABF) 21

Annex A (informative) Dimensional reference levels for application and production of the moulded parts 22

Annex B (informative)Causesandinfluentialfactorsonthemouldingshrinkageofnon-porous plastics .24

Annex C (informative) Evaluation of the production expense 25

Annex D (informative) Validation of machine, process and measuring instrumentation capability 28

Annex E (informative) Main causes for dimension, form and location deviations in moulded part production 29

Annex F (informative) Example for determining the DP dimension for application of Table 9 30

Annex G (informative) Feasible acceptance parameters 32

Bibliography 33
