

ISO 14531-2:2004-07 (E)

Plastics pipes and fittings - Crosslinked polyethyl ene (PE-X) pipe systems for the conveyance of gaseous fuels - Metric series - Specifications - Part 2: Fittings for heat-fusion jointing

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		2
3 Terms and definitions		3
4 Materials		7
5 Fittings		9
6 Elastomeric seals		20
7 Marking		20
8 Packaging		21
Annex A (informative) Method of test of the integrity of a fitting after an external blow		22
Annex B (normative) Resistance to gas constituents		24
Annex C (normative) Constant-strain thermal-cycling test		25
Annex D (normative) Validation of fitting design pressure DPF		27
Bibliography		29
