DIN EN 14511-3:2008-02 (E)

Air conditioners, liquid chilling packages and heat pumps with electrically driven compressors for space heati ng and cooling - Part 3: Test methods

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Rating capacity test 6
4.1 Basic principles 6
4.1.1 Heating capacity 6
4.1.2 Cooling capacity 6
4.1.3 Heat recovery capacity 7
4.1.4 Power input of fans for units without duct connection 7
4.1.5 Power input of fans for units with duct connection 8
4.1.6 Power input of liquid pumps 8
4.1.7 Units for use with remote condenser 9
4.2 Test apparatus 9
4.2.1 Arrangement of the test apparatus 9
4.2.2 Installation and connection of the test object 10
4.3 Uncertainties of measurement 11
4.4 Test procedure 12
4.4.1 General 12
4.4.2 Output measurement for water-to-water and water-to-air units 14
4.4.3 Output measurement for cooling capacity of air-to-water and air-to-air units 14
4.4.4 Output measurement for heating capacity of air-to-water and air-to-air units 15
4.5 Test results 17
4.5.1 Data to be recorded 17
4.5.2 Cooling capacity and heat recovery capacity calculation 19
4.5.3 Heating capacity calculation 20
4.5.4 Effective power input calculation 20

5 Heat recovery test for air-cooled multisplit systems 20
5.1 Test installation 20
5.1.1 General 20
5.1.2 Three-room calorimeter method 21
5.1.3 Three-room air-enthalpy method 21
5.1.4 Two-room air-enthalpy method 21
5.2 Test procedure 21
5.3 Test results 21

6 Test report 21
6.1 General information 21
6.2 Additional information 22
6.3 Rating test results 22

Annex A (informative) Calorimeter test method 23

Annex B (informative) Indoor air enthalpy test method 31

Annex C (informative) Heating capacity tests - Flow chart and examples of different test sequences 33

Annex D (informative) Conformance criteria 37

Annex E (informative) Symbols used in annexes 38

Annex F (informative) Test at system reduced capacity 40

Annex G (informative) Individual unit tests 41

Bibliography 43
