Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 8
3.1 Definitions 8
3.2 Symbols, quantities and units 11

4 Materials 13
4.1 General 13
4.2 Requirements for materials to be used for pressurised parts 14
4.3 Requirements for materials 14
4.4 Requirements for prevention of brittle fracture 15
4.5 Material documentation 16
4.6 Materials for non-pressure retaining parts 16

5 Pressure Vessel classification 16
5.1 Category of vessel 16
5.2 Fluid classification 17

6 Design 17
6.1 General 17
6.2 Corrosion and corrosion protection 17
6.3 Stress corrosion cracking 18
6.4 Loading 18
6.5 Maximum allowable pressure PS 18
6.6 Design pressure Pd 18
6.7 Calculation pressure P or Pc 19
6.8 Design temperature td 19
6.9 Minimum material temperature 19
6.10 Calculation temperature tc 19
6.11 Joint coefficient 20
6.12 Design stress 21
6.13 Access and inspection openings, venting and draining provisions, filling and discharge provisions and handling devices 22
6.14 Methods for design 23

7 Manufacturing 28
7.1 General 28
7.2 Material traceability 28
7.3 Manufacturing tolerances 28
7.4 Permanent joints 28
7.5 Forming of pressure parts 33
7.6 Post weld heat treatment 34
7.7 Internal cleanness 34
7.8 Repairs/Reworks 34
7.9 Finishing operations 34

8 Testing and inspection 35
8.1 Performance of inspection and testing 35
8.2 Design documentation, review and approval 35
8.3 Type approval 37
8.4 Calibration 37
8.5 Material 37
8.6 Manufacturing 38
8.7 Non destructive testing 38
8.8 Subcontracted elements 38
8.9 Final inspection 38
8.10 Marking 39
8.11 Documentation 40

Annex A (normative) Alternative requirements for prevention of brittle fracture: Method according to temperature stress cases 42

Annex B (normative) Specification and approval of brazing procedures, brazers and brazing operators 46

Annex C (normative) Pressure testing 60

Annex D (informative) Relations between the different pressures 64

Annex E (normative) Experimental methods 65

Annex F (normative) Material characteristics for design 70

Annex G (informative) Component classification in the sense of the Pressure Equipment Directive (PED) 72

Annex H (informative) Selection of module of conformity 73

Annex I (normative) Grouping system for materials 75

Annex J (informative) DN System 77

Annex K (normative) Specification and approval of expansion procedures and operators 78

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 97/23/EC 84

Bibliography 86
