DIN EN 16855-1:2017-05 (E)

Walk-in cold rooms - Definition, thermal insulation performance and test methods - Part 1: Prefabricated cold room kits

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Symbols and abbreviations 12

5 Performances 12
5.1 General 12
5.2 Thermal insulation performances 13
5.3 Other performances 13
5.3.1 Air permeability 13
5.3.2 Water vapour permeability 13

6 Methods to assess thermal insulation performances of prefabricated walk-in cold room components 13
6.1 General 13
6.2 Thermal conductivity of the insulating core of wall, ceiling and floor panels 14
6.3 Thermal transmittance of wall and ceiling panels 15
6.4 Thermal transmittance of floor panels 15
6.4.1 General 15
6.4.2 Test method 16
6.4.3 Calculation method 16
6.5 Thermal conductivity of doors 16
6.6 Thermal conductivity of windows 17
6.7 Thermal transmittance of corners 17
6.8 Influence of supporting profiles 17
6.9 Thermal bridges of the cold room 17
6.9.1 General 17
6.9.2 Thermal bridges in doors 17
6.9.3 Thermal bridges in panel to panel joint 17
6.9.4 Thermal bridges in panel to floor joint for walk-in cold rooms without insulated floor 18
6.9.5 Thermal bridges at corner joints 18
6.9.6 Thermal bridges of pass through holes 18
6.9.7 Thermal bridges of refrigerating units 18

7 Methods to assess thermal insulation performances of prefabricated walk-in cold room kits and total power consumption 19
7.1 General 19
7.2 Overall heat transfer coefficient of walk-in cold room kits 19
7.3 Total power consumption of walk-in cold room 19

8 Installation of walk-in cold rooms 20

9 Attestation of conformity - Factory Production Control (FPC) 20

Annex A (normative) Determination of the declared values of thermal resistance and thermal conductivity 22

A.1 General 22
A.2 Input data 22
A.3 Declared values 22

Annex B (normative) Determination of the aged values of thermal resistance and thermal conductivity 24

B.1 General 24
B.2 Sampling and conditioning 25
B.3 Measurement of the initial value of the thermal conductivity 25
B.4 Evaluation of the thermal conductivity value with the accelerated ageing 25
B.5 Fixed increments method 26
B.6 Declaration of the aged values of thermal resistance and thermal conductivity 28

Annex C (informative) Walk-in cold rooms documentation 30

Annex D (informative) Guide on installation 32

D.1 General 32
D.2 Preliminary provisions 32
D.3 Installation, assembly and locking of panels 33
D.4 Maintenance and cleaning of the walk-in cold room 46

Bibliography 49
