

DIN EN 14276-1:2020-11 (E)

Pressure equipment for refrigerating systems and heat pumps - Part 1: Vessels - General requirements

Contents		Page
European foreword		8
Introduction		9
1	Scope	10
2	Normative references	10
3	Terms and definitions	14
3.1	Terms and definitions	14
3.2	Symbols, descriptions and units	17
4	Materials	20
4.1	General	20
4.2	Requirements for materials to be used for pressurized parts	20
4.3	Requirements for materials	20
4.3.1	General	20
4.3.2	Cladding	21
4.3.3	Special considerations	21
4.4	Requirements for prevention of brittle fracture	22
4.4.1	General	22
4.4.2	Material requirements	23
4.5	Material documentation	23
4.6	Materials for non-pressure retaining parts	23
5	Pressure vessel classification	23
5.1	Category of vessel	23
5.2	Fluid classification	24
6	Design	25
6.1	General	25
6.2	Corrosion and corrosion protection	25
6.2.1	General	25
6.2.2	Internal corrosion	25
6.2.3	External corrosion	25
6.2.4	Corrosion allowance information	25
6.3	Stress corrosion cracking	26
6.4	Loading	26
6.5	Maximum allowable pressure PS	26
6.6	Design pressure Pd	26
6.7	Calculation pressure P or Pc	27
6.8	Design temperature td	27
6.9	Minimum material temperature	27
6.10	Calculation temperature tc	27
6.10.1	General	27
6.10.2	Vessel without heater	27
6.10.3	Vessel with heater	28
6.11	Joint coefficient	28
6.12	Design stress	30
6.13	Access and inspection openings, venting and draining provisions, filling and discharge provisions and handling devices	32

6.13.1	Non corrosive fluids	32
6.13.2	Corrosive fluids	32
6.13.3	Venting and draining provisions	32
6.13.4	Filling and discharge provision	32
6.13.5	Handling devices	32
6.14	Methods for design	33
6.14.1	General	33
6.14.2	Design by formulas (DBF)	33
6.14.3	Joint design	38
7	Manufacturing	40
7.1	General	40
7.2	Material traceability	40
7.3	Manufacturing tolerances	40
7.4	Permanent joints	40
7.4.1	General	40
7.4.2	Permanent joint and operator qualification	40
7.4.3	Permanent joint operations and traceability	40
7.4.4	Welding	40
7.4.5	Brazing	41
7.4.6	Permanent joints by deformation	43
7.4.7	Non-permanent joints	43
7.5	Forming of pressure parts	44
7.5.1	General	44
7.5.2	Deep drawing	44
7.6	Post weld heat treatment	45
7.7	Internal cleanness	45
7.8	Repairs/Reworks	45
7.9	Finishing operations	45
8	Testing and inspection	45
8.1	Performance of inspection and testing	45
8.2	Design documentation, review and approval	46
8.2.1	General	46
8.2.2	Design documentation	46
8.2.3	Design examination and design approval	47
8.2.4	Design documentation change	48
8.3	Type examination	48
8.4	Calibration	48
8.5	Material	48
8.6	Manufacturing	49
8.7	Non-destructive and destructive testing of welded joints	49
8.8	Brazed joints	50
8.9	Subcontracted elements	50
8.10	Final inspection	50
8.10.1	General	50
8.10.2	Visual examination	50
8.10.3	Examination of documentation	51
8.10.4	Pressure test	51
8.10.5	Leak test	51
8.11	Marking	52
8.12	Documentation	52
8.12.1	General	52
8.12.2	Manufacturer's instruction	52
8.12.3	Technical documentation for user	53
8.12.4	Records	53
Annex A	(normative) Alternative requirements for prevention of brittle fracture: Method according to temperature stress cases	55
A.1	General	55
A.2	Temperature stress cases	57

A.3	Determination of lowest application temperatures for stress cases min t0 75, min t0 50 and min t0 25	57
A.4	Welding conditions	58
A.4.1	Welded connections	58
A.4.2	Heat treatment after welding	59
A.5	Proof of notch impact energy	59
Annex B (normative) Specification and approval of brazing procedures		60
B.1	Introduction	60
B.2	General	60
B.2.1	Responsibility	60
B.2.2	Specification of brazing procedures	60
B.2.3	Technical content of BPS	61
B.3	Test piece	66
B.4	Examination and testing	66
B.4.1	General	66
B.4.2	Visual examination	67
B.4.3	Tensile test	67
B.4.4	Bend test	67
B.4.5	Peel test	68
B.4.6	Metallographic examination	68
B.5	Range of approval	68
B.5.1	General	68
B.5.2	Related to the manufacturer	68
B.5.3	Related to the material	68
B.5.3.1	Parent metal	68
B.5.3.2	Thickness	69
B.5.4	Range of approval	69
B.5.4.1	General	69
B.5.4.2	Angle of branch connection	70
B.5.4.3	Brazing process	70
B.5.4.4	Flow position	70
B.5.4.5	Joint design	70
B.5.4.6	Filler material	70
B.5.4.7	Brazing temperature	71
B.5.4.8	Brazing flux	71
B.5.4.9	Fuel gas, atmosphere, nature of flame or type of energy	71
B.5.4.10	Post braze heat treatment	71
B.6	Brazing Procedure Approval Record (BPAR)	71
Annex C (normative) Pressure testing		72
C.1	Pressure test	72
C.1.1	General	72
C.1.2	Basic requirements	72
C.1.2.1	Pressure vessels	72
C.1.2.2	Accessories	72
C.1.2.3	Safety	72
C.1.2.4	Hydraulic test	72
C.1.2.5	Pneumatic test	73
C.1.3	Pressure test	73
C.1.3.1	Value of test pressure	73
C.1.3.2	Specific value of test pressure for compressor housing	73
C.1.3.3	Temperature requirement	73
C.1.3.4	Test procedure	74
C.1.3.5	Pass fail criteria	74
C.1.3.6	Requirements for pressure gauges	74
C.1.4	Final test report	74
C.2	Acoustic emission examination	75
Annex D (normative) Relations between the different pressures		76

Annex E (normative) Experimental design methods	77
E.1 Introduction	77
E.1.1 General	77
E.1.2 Methods	77
E.1.3 Documentation	78
E.1.4 Duplicate or similar parts	78
E.1.4.1 General	78
E.1.4.2 Duplicate parts	78
E.1.4.3 Geometrically similar part	78
E.1.5 Examination of the components or the vessel	78
E.1.6 Application of pressure	78
E.1.7 Material properties	79
E.2 Strain gauge test method	79
E.2.1 General	79
E.2.2 Procedure	79
E.3 Burst test	80
E.3.1 General	80
E.3.2 Procedure	80
E.3.3 Burst pressure	80
E.4 Housings of hermetic compressors of testing group 2b and vessels of testing group 2b	80
E.4.1 General	80
E.4.2 Burst test method for housings of vessels	82
E.4.3 Burst test method for housings of compressor	82
E.4.4 Combined burst test / fatigue test method for housings of compressor	83
E.4.4.1 General and burst tests	83
E.4.4.2 Additional fatigue test	84
Annex F (normative) Material characteristics for design	86
Annex G (informative) Component classification in the sense of the Pressure Equipment Directive (PED)	90
Annex H (informative) Selection of category	92
H.1 General	92
H.2 Definition of category for vessels for refrigerating pressure vessel	92
Annex I (normative) Grouping system for materials (extracted from CEN ISO/TR 15608)	93
I.1 Grouping system for steels	93
I.2 Grouping system for aluminium and aluminium alloys	93
I.3 Grouping system for copper and copper alloys	94
Annex J (informative) DN System	95
Annex K (normative) Specification and approval of expansion procedures and operators	97
K.1 General	97
K.1.1 General rules	97
K.1.2 Responsibility	97
K.1.3 Specification of expansion procedures	97
K.1.4 Technical content of EPS	97
K.2 Test piece	99
K.3 Examination and testing	99
K.3.1 General	99
K.3.2 Visual examination	99
K.3.3 Dimensional verification	99
K.3.4 Tests	100
K.4 Range of approval	100
K.4.1 General	100

K.4.2	Related to the manufacturer	100
K.4.3	Related to the material	100
K.4.4	Tube dimensions	100
K.4.5	Expansion factor	100
K.4.6	Expansion process	100
K.4.7	Joint design	100
K.4.8	Tool	100
K.5	Expansion Procedure Approval Record (EPAR)	101
K.6	Expansion operator approval	101
K.6.1	General	101
K.6.2	Validity range of expansion operator qualification	101
K.6.3	Qualification tests	101
K.6.3.1	General.....	101
K.6.3.2	Test.....	piece 101
K.6.3.3	Assessment.....	of the test piece 101
K.6.4	Examination and testing	101
K.6.5	Period of validity	102
K.6.5.1	Initial.....	approval 102
K.6.5.2	Prolongation.....	102
K.6.6	Certification	102
Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2014/68/EU (Pressure equipment Directive) aimed to be covered		103
