ISO 916:2020-02 (E)

Testing of refrigerating syst ems

Contents

Page

Foreword v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Symbols and units 2

5 Performance warranty 3
5.1 General 3
5.2 Subject of technical warranties 3
5.2.1 General 3
5.2.2 Refrigerating capacity 3
5.2.3 Compressor absorbed power 3
5.2.4 Absorbed power of ancillaries 4
5.2.5 Absorbed power of the entire system 4
5.2.6 Cooling water demand 4
5.2.7 Coefficient of performance 4
5.3 Operating conditions for technical warranties 4
5.3.1 General 4
5.3.2 Overall refrigerating capacity 4
5.3.3 Net or useful refrigerating capacity 4
5.3.4 Conversion to warranty conditions 4
5.4 Tolerance 5
5.5 Acceptance limit 5

6 Test preparation and procedure 5

7 Measuring instruments 6
7.1 General 6
7.2 Temperature measuring instruments 6
7.3 Pressure gauges 6
7.4 Measuring instruments for electric power 6
7.5 Flow meters 6
7.6 Speed measuring devices 6
7.7 Torque measuring devices 7
7.8 Time measuring devices 7
7.9 Mass measuring devices 7

8 Determination of the refrigerating capacity 7
8.1 Direct methods 7
8.1.1 Overall refrigerating capacity 7
8.1.2 Net refrigerating capacity for a liquid cooled medium 11
8.1.3 Useful refrigerating capacity 12
8.2 Indirect methods 12
8.2.1 General 12
8.2.2 Determination of the overall refrigerating capacity by means of a calibrated compressor 12
8.2.3 Determination of the net refrigerating capacity 13
8.2.4 Determination of the useful refrigerating capacity 13
8.2.5 Determination of the overall refrigerating capacity from the overall energy balance 13

9 Determination of the drive power 14
9.1 Power absorbed by the compressor 14

10 Measurement uncertainties 14

11 Results, conversion to guaranteed values 15

12 Material properties 15

Bibliography 17
