# ISO 13256-2:2021 (E)

## Water-source heat pumps — Testing and rating for performance — Part 2: Water-to-water and brine-to-water heat pumps

# Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Symbols

5 Rating and test conditions

5.1 Rating conditions for the determination of net capacities
5.1.1 Ratings
5.1.2 Load side liquid pump adjustment
5.1.2.1 Heat pump with non-integrated load side liquid pump
5.1.2.2 Heat pump with integrated load side liquid pump
5.1.3 Source side liquid pump adjustment
5.1.3.1 Heat pump with non-integrated source side liquid pump
5.1.3.2 Heat pump with integrated source side liquid pump
5.1.4 Liquid flow rates
5.1.4.1 General
5.1.4.2 Source side flowrate
5.1.4.3 Load side flowrate
5.1.4.3.1 Ratings where the leaving temperature on the load side is fixed
5.1.4.3.2 Rating where the leaving temperature on the load side is not fixed
5.1.5 Installation and connection of the unit
5.1.5.1 General
5.1.5.2 Requirements for separated assemblies
5.1.5.3 Measuring points
5.1.6 Test liquids
5.2 Rating test conditions for cooling and heating capacities

6 Performance Requirements

6.1 General
6.2 Maximum operating conditions test
6.2.1 Test conditions
6.2.2 Test procedures
6.2.3 Test requirements
6.3 Minimum operating conditions test
6.3.1 Test conditions
6.3.2 Test procedures
6.3.3 Test requirements
6.4 Enclosure sweat and condensate test
6.4.1 General
6.4.2 Test conditions
6.4.3 Test procedures
6.4.4 Test requirements

7 Test methods

7.1 General
7.2 General test requirements

7.3 Equipment installation
7.4 Cooling and heating capacity tests procedure
7.4.1 Reconditioning period
7.4.2 Data collection period
7.4.3 Net cooling capacity
7.4.3.1 Heat pump with non-integrated load side liquid pump
7.4.3.2 Heat pump with integrated load side liquid pump
7.4.4 Net heating capacity
7.5 Uncertainties of measurement
7.6 Data to be recorded
7.7 Uncertainties of measurements and permissible deviations for steady-state cooling and heating capacity tests
7.8 Test results

8 Marking provisions

8.1 Nameplate requirements
8.2 Nameplate information
8.3 Designation of standard rating capacities
8.4 Refrigerant Designation

9 Publication of ratings

9.1 Published ratings
9.2 Additional ratings

Annex A (informative) Refrigerant enthalpy test method

A.1 General
A.2 Refrigerant flow method
A.3 Refrigerant temperature, pressure, and flow measurements
A.4 Calculation of cooling capacity
A.5 Calculation of heating capacities

Annex B (normative) Liquid enthalpy test method

B.1 General
B.2 Application
B.3 Calculations
B.3.1 Cooling capacity
B.3.2 Heating capacity

Annex C (informative) Additional ratings based upon previous standard version ISO 13256-2:1998
