DIN EN 16440-2:2024-01 (E)

Testing methodologies f or refrigerating devices for insulated means of transport - Part 2: Eutectic cooling devices

Contents

Page

European foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5
3.1 General terms and definitions 5
3.2 Terms and definitions for eutectic units with fans only 9
3.3 Typical setups for direct and indirect eutectic cooling devices 9
3.4 Symbols and uncertainties 11

4 Requirements 12
4.1 General 12
4.2 Description of the eutectic cooling devices and eutectic units 12
4.3 Test equipment 12
4.3.1 General requirements 12
4.3.2 Requirements for the calorimeter box 13
4.3.3 Requirements for the conditioned test room 16
4.4 Installation and connection of the eutectic cooling device 17
4.4.1 General 17
4.4.2 Installation of eutectic cooling device with locally separated components (split system) 17

5 Test conditions and methodology 17
5.1 General 17
5.2 Test conditions 17
5.2.1 Generality and rated conditions 17
5.2.2 Temperature measurements 18
5.3 Testing of dependent eutectic cooling device 19
5.3.1 General 19
5.3.2 Mandatory test 1: Testing of the charging time and the total energy consumption of the eutectic cooling device 21
5.3.3 Mandatory test 2: Testing of the maximum cooling time and the useful cooling energy 21
5.3.4 Optional test 3: Testing of the recharging time 22
5.3.5 Optional test 4: Testing of cooling time and energy after recharging 22
5.3.6 Measurements for performance testing 22
5.4 Time measurement 23
5.5 Functional tests - Defrosting device test 23
5.6 Air flow measurement 23

6 Test results 23
6.1 General 23
6.2 Useful cooling capacity 24
6.3 Total power 25
6.4 Determination of the cooling energy efficiency ratio EER_C 25

7 Test report 26

8 Marking 27

8.1 Marking, type plate 27
8.2 Information on total energy consumption 27
Bibliography 28
