

DIN EN 14276-1:2006-09 (E)

Pressure equipment for refrigerating systems and heat pumps - Part 1: Vessels - General requirements

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	8
3.1	Definitions	8
3.2	Symbols, quantities and units	11
4	Materials	13
4.1	General	13
4.2	Requirements for materials to be used for pressurised parts	14
4.3	Requirements for materials	14
4.4	Requirements for prevention of brittle fracture	15
4.5	Material documentation	16
4.6	Materials for non-pressure retaining parts	16
5	Pressure Vessel classification	16
5.1	Category of vessel	16
5.2	Fluid classification	17
6	Design	17
6.1	General	17
6.2	Corrosion and corrosion protection	17
6.3	Stress corrosion cracking	18
6.4	Loading	18
6.5	Maximum allowable pressure P_S	18
6.6	Design pressure P_d	18
6.7	Calculation pressure P or P_c	19
6.8	Design temperature t_d	19
6.9	Minimum material temperature	19
6.10	Calculation temperature t_c	19
6.11	Joint coefficient	20
6.12	Design stress	21
6.13	Access and inspection openings, venting and draining provisions, filling and discharge provisions and handling devices	22
6.14	Methods for design	23
7	Manufacturing	28
7.1	General	28
7.2	Material traceability	28
7.3	Manufacturing tolerances	28
7.4	Permanent joints	28
7.5	Forming of pressure parts	33
7.6	Post weld heat treatment	33
7.7	Internal cleanliness	33
7.8	Repairs/Reworks	34
7.9	Finishing operations	34

8	Testing and inspection	34
8.1	Performance of inspection and testing	34
8.2	Design documentation, review and approval	34
8.3	Type approval	36
8.4	Calibration	36
8.5	Material	37
8.6	Manufacturing	37
8.7	Non destructive testing	37
8.8	Subcontracted elements	37
8.9	Final inspection	37
8.10	Marking	38
8.11	Documentation	39
Annex A	(normative) Alternative requirements for prevention of brittle fracture: Method according to temperature stress cases	41
Annex B	(normative) Specification and approval of brazing procedures, brazers and brazing operators	45
Annex C	(normative) Pressure testing	59
Annex D	(informative) Relations between the different pressures	63
Annex E	(normative) Experimental methods	64
Annex F	(normative) Material characteristics for design	69
Annex G	(informative) Component classification in the sense of the Pressure Equipment Directive (PED)	71
Annex H	(informative) Selection of module of conformity	72
Annex I	(normative) Grouping system for materials	74
Annex J	(informative) DN System	76
Annex K	(normative) Specification and approval of expansion procedures and operators	77
Annex ZA	(informative) Relationship between this European Standard and the Essential Requirements of EU Directive 97/23/EC	83
Bibliography	85
