ISO 23783-2:2022-08 (E)

Automated liquid handling systems - Part 2: Measurement procedures for the determination of volumetric performance

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Abbreviated terms 1

5 Measurement methods 2
5.1 Overview of methods suitable for measuring ALHS performance 2
5.2 Photometric methods 9
5.2.1 Dual-dye ratiometric photometric method 9
5.2.2 Single-dye photometric method 9
5.2.3 Fluorescence method 9
5.3 Gravimetric methods 9
5.3.1 Single channel method 9
5.3.2 Regression analysis 10
5.4 Hybrid photometric/gravimetric method 10
5.5 Dimensional methods 10
5.5.1 Optical image analysis of droplets 10
5.5.2 Optical image analysis of capillaries 11

6 Equipment and preparation 11
6.1 Test equipment 11
6.2 Manually operated single- and multi-channel pipettes 12
6.3 Preparation for testing 12

7 Thermal expansion 13

8 Traceability and measuring system uncertainty 13
8.1 Traceability 13
8.2 Estimation of measuring system uncertainty 13
8.2.1 Whole system approach 13
8.2.2 Measurement model approach 13

9 Reporting 14

Annex A (normative) Calculation of liquid volumes from balance readings 15

Annex B (normative) Dual-dye ratiometric photometric procedure 18

Annex C (normative) Single dye photometric procedure 24

Annex D (normative) Gravimetric procedure, single channel measurement 29

Annex E (normative) Gravimetric regression procedure 33

Annex F (normative) Photometric/gravimetric hybrid procedure 39

Annex G (normative) Optical image analysis of droplets 48

Annex H (normative) Fluorescence procedure 57

Annex I (normative) Optical image analysis of capillaries 70
