

# DIN EN 16117-2:2013-02 (E)

## Copper and copper alloys - Determination of copper content - Part 2: Electrolytic determination of copper in materials with copper content higher than 99,80 %

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
1	Scope .....	4
2	Normative references .....	4
3	Principle .....	4
4	Reagents .....	4
5	Apparatus .....	5
6	Sampling .....	5
7	Procedure .....	5
8	Expression of results .....	6
9	Precision .....	6
10	Test report .....	7
Annex A (normative) Spent electrolyte -- Determination of residual copper -- Flame atomic absorption spectrometric method (FAAS) .....		8
Bibliography .....		11
