

DIN EN 16117-2:2013-02 (E)

Copper and copper alloys - Determination of copper content - Part 2: Electrolytic determination of copper in materials with copper content higher than 99,80 %

Contents		Page
Foreword		3
1	Scope	4
2	Normative references	4
3	Principle	4
4	Reagents	4
5	Apparatus	5
6	Sampling	5
7	Procedure	5
8	Expression of results	6
9	Precision	6
10	Test report	7
Annex A (normative) Spent electrolyte -- Determination of residual copper -- Flame atomic absorption spectrometric method (FAAS)		8
