DIN EN 17263:2019-09 (E)

Copper and copper alloys - Eddy current testing on the outer surface of rods, bars, hollow rods a nd wires for the detection of defects by encircling test coil

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 General requirements 5

5 Personnel qualification 6

6 Eddy Current Test equipment 6
6.1 Test layout 6
6.1.1 Nominal frequency 6
6.1.2 Test coil 7
6.2 Reference standard 7

7 Calibration and Verification 8

8 Acceptance criteria 9
8.1 Detection of single local discontinuity by encircling coils systems 9
8.2 Detection of several local surface effects by-encircling coils systems by using low signal amplitudes as detection threshold 9

9 Other methods 10
