Foreword 4

Introduction 5

1 Scope 5

2 Normative references 6

3 Product definition 7
3.1 Chemical composition 7
3.1.1 Values to be achieved 7
3.1.2 Location of the sample 7
3.1.3 Chemical analysis 7
3.2 Mechanical characteristics 7
3.2.1 Tensile test characteristics 7
3.2.2 Hardness characteristics in the rim 9
3.2.3 Impact test characteristics 10
3.2.4 Fatigue characteristics 11
3.2.5 Toughness characteristic of the rim 12
3.3 Heat treatment homogeneity 13
3.3.1 Values to be achieved 13
3.3.2 Test pieces 13
3.3.3 Test method 13
3.4 Material cleanliness 13
3.4.1 Micrographic cleanliness 13
3.4.2 Internal integrity 14
3.5 Residual stresses 17
3.5.1 General 17
3.5.2 Values to be achieved 17
3.5.3 Test piece 18
3.5.4 Measurement methods 18
3.6 Surface characteristics 18
3.6.1 Surface appearance 18
3.6.2 Surface integrity 19
3.7 Geometric tolerances 19
3.8 Static imbalance 22
3.9 Protection against corrosion 22
3.10 Manufacturer's marking 23

stage 24

A.1 Sampling 24
A.2 Analysis methods 24
A.3 Precautions 24

B.1 Test piece 25
B.2 Test rig 25
B.3 Test monitoring 25
B.4 Analysis of results 25

residual stresses located deep under the tread (Destructive method) 26

C.1 Principle of the method 26
C.2 Procedure 26

Annex C (informative) Strain gauge method for determining the variations of circumferential
Annex B (informative) Example of test method for the determination of fatigue characteristics 25

Annex A (normative) Control of the hydrogen content in the steel for solid wheels at the melting
C.3 Calculation of the variation of the circumferential residual stress located deep under the tread 27

destructive method) 32

D.1 Introduction 32
D.2 Method of measurement 32
D.3 Evaluation of results 33

E.1 General 34
E.2 Requirements 34
E.3 Qualification procedure 35
E.4 Qualification certificate 37
E.5 Qualification file 38

F.1 General 39
F.2 Delivery condition 40
F.3 Controls on each wheel 40
F.4 Batch control 40
F.5 Quality plan 43
F.6 Allowable rectification 43

other provisions of EU Directives 44

! Requirements of EU Directive 2001/16/EC of the European Parliament and of the Council of 19
March 2001 on the interoperability of the trans-European conventional rail system, as modified by EU Directive 2004/50/EC of 29 April 2004""""" 46

Bibliography 49

Annex D (informative) Ultrasonic method for determining the residual stresses in the rim (non-
Annex ZA (informative) Clauses of this European Standard addressing essential requirements or Annex ZB (informative) !!Relationship between this European Standard and the Essential Annex F (informative) Product delivery 39

Annex E (informative) Product qualification 34
