

# DIN EN 13262:2010-07 (E)

## Railway applications - Wheelsets and bogies - Wheels - Product requirements (includes Amendment A1:2008)

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
<b>1</b>	<b>Scope .....</b>	<b>5</b>
<b>2</b>	<b>Normative references .....</b>	<b>6</b>
<b>3</b>	<b>Product definition .....</b>	<b>7</b>
3.1	Chemical composition .....	7
3.1.1	Values to be achieved .....	7
3.1.2	Location of the sample .....	7
3.1.3	Chemical analysis .....	7
3.2	Mechanical characteristics .....	7
3.2.1	Tensile test characteristics .....	7
3.2.2	Hardness characteristics in the rim .....	9
3.2.3	Impact test characteristics .....	10
3.2.4	Fatigue characteristics .....	11
3.2.5	Toughness characteristic of the rim .....	12
3.3	Heat treatment homogeneity .....	13
3.3.1	Values to be achieved .....	13
3.3.2	Test pieces .....	13
3.3.3	Test method .....	13
3.4	Material cleanliness .....	13
3.4.1	Micrographic cleanliness .....	13
3.4.2	Internal integrity .....	14
3.5	Residual stresses .....	17
3.5.1	General .....	17
3.5.2	Values to be achieved .....	17
3.5.3	Test piece .....	18
3.5.4	Measurement methods .....	18
3.6	Surface characteristics .....	18
3.6.1	Surface appearance .....	18
3.6.2	Surface integrity .....	19
3.7	Geometric tolerances .....	19
3.8	Static imbalance .....	22
3.9	Protection against corrosion .....	22
3.10	Manufacturer's marking .....	23
stage	.....	24
A.1	Sampling .....	24
A.2	Analysis methods .....	24
A.3	Precautions .....	24
B.1	Test piece .....	25
B.2	Test rig .....	25
B.3	Test monitoring .....	25
B.4	Analysis of results .....	25
residual stresses located deep under the tread (Destructive method)	.....	26

C.1	Principle of the method .....	26
C.2	Procedure .....	26
<b>Annex C (informative) Strain gauge method for determining the variations of circumferential</b>		
<b>Annex B (informative) Example of test method for the determination of fatigue</b>		
	<b>characteristics .....</b>	<b>25</b>
<b>Annex A (normative) Control of the hydrogen content in the steel for solid wheels at the melting</b>		
<b>C.3 Calculation of the variation of the circumferential residual stress located deep under</b>		
<b>the tread .....</b>		
	<b>destructive method) .....</b>	<b>32</b>
D.1	Introduction .....	32
D.2	Method of measurement .....	32
D.3	Evaluation of results .....	33
E.1	General .....	34
E.2	Requirements .....	34
E.3	Qualification procedure .....	35
E.4	Qualification certificate .....	37
E.5	Qualification file .....	38
F.1	General .....	39
F.2	Delivery condition .....	40
F.3	Controls on each wheel .....	40
F.4	Batch control .....	40
F.5	Quality plan .....	43
F.6	Allowable rectification .....	43
<b>other provisions of EU Directives .....</b>		
	<b>! Requirements of EU Directive 2001/16/EC of the European Parliament and of the Council of 19</b>	
<b>March 2001 on the interoperability of the trans-European conventional rail system, as</b>		
<b>modified by EU Directive 2004/50/EC of 29 April 2004"....."</b>		
	<b>.....</b>	<b>46</b>
<b>Bibliography .....</b>		
	<b>.....</b>	<b>49</b>
<b>Annex D (informative) Ultrasonic method for determining the residual stresses in the rim (non-</b>		
<b>Annex ZA (informative) Clauses of this European Standard addressing essential</b>		
<b>requirements or Annex ZB (informative) !!Relationship between this European Standard</b>		
<b>and the Essential Annex F (informative) Product delivery .....</b>		
	<b>.....</b>	<b>39</b>
<b>Annex E (informative) Product qualification .....</b>		
	<b>.....</b>	<b>34</b>
