

# DIN EN 14730-1:2010-12 (E)

## Railway applications - Track - Aluminothermic welding of rails - Part 1: Approval of welding processes (includes Amendment A1:201 0)

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	6
4	Information to be supplied by the railway authority .....	7
5	Approval procedure .....	8
5.1	General .....	8
5.2	Process identification .....	8
5.3	General requirements .....	8
5.4	Initial compliance testing .....	9
5.5	Extension of initial compliance testing .....	10
5.6	Documents to be submitted with the request for approval .....	11
5.6.1	The process manual .....	11
5.6.2	Drawing with the required measurements .....	11
5.6.3	Chemical analysis ranges and tolerances .....	12
5.7	Preparation and allocation of test welds .....	12
6	Re-approval following process changes .....	13
7	Laboratory tests .....	16
7.1	Visual surface examination .....	16
7.1.1	As cast weld surface .....	16
7.1.2	Ground weld surface .....	16
7.1.3	Visible heat affected zone .....	17
7.2	Running surface hardness test .....	17
7.3	Slow bend test .....	18
7.4	Internal examination .....	18
7.4.1	Weld soundness .....	18
7.4.2	Fusion zone - shape and dimension .....	21
7.4.3	Microscopic examination .....	22
7.4.4	Heat softened zone width .....	22
7.5	Fatigue test .....	22
7.6	Chemical analysis .....	23
Annex A (informative) Steps in approval .....		25
Annex B (informative) Suggested sequence of laboratory tests .....		26
Annex C (normative) Ultrasonic testing procedure for aluminothermic welds in rail .....		27
C.1	A test of the head zone of the weld (non-planar defects) .....	27
C.2	A test of the head zone of the weld (planar defects) .....	27
C.3	A test of the head and web zone of the weld (planar defects) .....	27
C.4	A test of the middle zone of the foot of the weld .....	27

C.5	A test of the ankle zone of the foot of the weld .....	28
C.6	A test of the toe zone of the foot of the weld .....	28
C.7	!!!Calibration"""" .....	29
Annex D (normative) Procedure for FRY etching .....		31
Annex E (normative) Procedure for measurement of surface hardness .....		32
Annex F (normative) Procedure for slow bend test .....		33
Annex G (normative) Procedure for recording test weld fracture face defects .....		34
Annex H (normative) Ultrasonic inspection procedure on aluminothermic welds to be sectioned ....		36
H.1	Principle .....	36
H.2	Apparatus .....	36
H.3	Preparation of samples .....	36
H.4	Calibration .....	36
H.5	Testing .....	37
H.6	Reporting .....	37
Annex I (normative) Procedure for microscopic examination of the visible heat affected zone and fusion zone of welds .....		38
Annex J (normative) Procedure for measurement of the heat softened zone width .....		39
J.1	Measurement of hardness .....	39
J.2	Evaluation of hardness data .....	40
J.2.1	General .....	40
J.2.2	Mean hardness of parent rail .....	40
J.2.3	Measurement hardness line .....	40
J.2.4	Heat softened zone width measurement .....	41
J.2.5	Parent rail hardness variation .....	41
Annex K (normative) Fatigue test methods for aluminothermic welds .....		42
K.1	Scope .....	42
K.2	Test equipment .....	42
K.3	Calibration procedure .....	43
K.3.1	General .....	43
K.3.2	Test piece .....	43
K.3.3	Test piece preparation .....	43
K.3.4	Instrumentation .....	44
K.3.5	Procedure .....	44
K.4	Fatigue test method .....	47
K.4.1	General .....	47
K.4.2	Staircase testing method .....	47
K.4.3	Example of the data analysis of a fatigue strength determination by the staircase method .....	49
K.4.4	Past-the-post testing method .....	50
Annex L (informative) A-deviations .....		51
