

DIN EN 15807:2011-05 (E)

Railway applications - Pneumatic half couplings

Contents		Page
Foreword		4
1	Scope	5
2	Normative references	5
3	Terms, definitions, symbols and abbreviations	5
3.1	Terms and definitions	5
3.2	Abbreviations	6
4	Design and manufacture	7
4.1	Requirements	7
4.1.1	Brake pipe	7
4.1.2	Main reservoir pipe	7
4.1.3	Flexible hose	7
4.1.4	Ring-shaped elastomer joints	10
4.1.5	Coupling heads	11
4.2	Compressed air quality	18
4.3	Ambient temperature	19
4.4	Environmental corrosion conditions	19
4.5	Leakage	19
4.6	Mechanical strength of assembly	19
4.7	Vacuum withstand	19
4.8	External appearance	19
4.9	Fire behaviour	19
5	Type test methods	20
5.1	Sampling for type test	20
5.2	Test requirements	20
5.3	Test procedure flexible hose	20
5.3.1	Nature and proportion of the tests and inspections	20
5.3.2	Preparation of the test pieces	22
5.3.3	Bend test	22
5.3.4	Pressure test	23
5.3.5	Bursting test	23
5.3.6	Adhesion of the reinforcement	24
5.3.7	Test of dynamic fatigue through repeated tensile loadings of the internal and external layers	25
5.3.8	Test for residual deformation through static tensile loading after ageing	25
5.3.9	Impact test	25
5.3.10	Test for Resistance to ozone cracking of the external layer under static conditions	27
5.3.11	Deflection at low temperature	27
5.3.12	Test for fitting of connections on hoses	29
5.3.13	Uncoupling test	31
5.3.14	Flare test	31
5.3.15	Hardness test	32
5.4	Test procedure ring-shaped elastomer joints	32
5.4.1	Nature and proportion of the tests and inspections	32
5.4.2	Preparation of the test pieces	34
5.4.3	Hardness test	34
5.4.4	Tensile strength test	34
5.4.5	Deformation tests	34

5.4.6	Water tightness test	36
5.5	Test procedure pneumatic half coupling	36
5.5.1	Principle	36
5.5.2	Check of physical and geometrical characteristics	37
5.5.3	Hydraulic test of the assembly at given pressure	37
5.5.4	Leakage	37
5.5.5	Corrosion test	39
5.5.6	Pull test	39
5.6	Documentation	40
6	Individual inspection	40
7	In-Service assessment	41
8	Designation	41
9	Identification and marking	41
Annex A (informative) Vacuum withstand		42
Annex B (informative) MRP pneumatic half coupling for emergency coupling hoses		43
B.1	General	43
B.2	Coupling head	43
B.3	Identification	43
Annex C (informative) In-service trial		45
C.1	General	45
C.2	Test set-up and sampling	45
C.3	Procedure	45
C.4	Pass/fail criteria	45
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC		46
Bibliography		50
