

# DIN EN 15227:2011-01 (E)

## Railway applications - Crashworthiness requirements for railway vehicle bodies (includes Amendment A1:2010)

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
1	Scope .....	5
2	Normative references .....	6
3	Terms and definitions .....	6
4	Crashworthiness design categories of railway vehicles .....	8
5	Design collision scenarios .....	9
6	Structural passive safety .....	11
6.1	General principles .....	11
6.2	Overriding .....	12
6.2.1	Requirements .....	12
6.2.2	Explanatory notes (informative) .....	12
6.3	Survival space, intrusion and egress .....	13
6.3.1	Requirements .....	13
6.3.2	Explanatory notes (informative) .....	14
6.4	Deceleration limit/collision pulse .....	14
6.4.1	Requirement .....	14
6.4.2	Explanatory notes (informative) .....	15
6.5	Obstacle deflector .....	15
6.5.1	Requirement .....	15
6.5.2	Explanatory notes (informative) .....	16
7	Validation of crashworthiness .....	17
Annex A (informative) Parameters of design collision scenarios .....		19
A.1	Introduction .....	19
A.2	Determining the design collision scenarios for collision risks which differ from the normal European operations .....	20
A.2.1	Design collision scenarios .....	20
A.2.2	Risk analysis .....	20
A.2.3	Factors to be considered in the risk assessment .....	21
A.2.4	Collisions following derailment .....	21
A.2.5	Bibliography of relevant accident information .....	22
Annex B (normative) Requirements of a validation programme .....		23
B.1	Test specifications .....	23
B.1.1	Test programme .....	23
B.1.2	Acceptance criteria for calibration/validation tests .....	23
B.2	Numerical simulations .....	24
B.2.1	Numerical model validation .....	24
B.2.2	Simulation modelling .....	24

<b>Annex C (normative) Reference obstacle definitions</b>	<b>26</b>
C.1 80 t wagon	26
C.2 C-III Reference obstacle	27
C.3 Large deformable obstacle	29
C.4 C-IV Corner collision obstacle	31
<b>Annex D (normative) Reference train definitions - Defined formations</b>	<b>32</b>
D.1 Reference trains for locomotive, power head, driving trailer and coach design	32
D.2 Locomotive design	32
D.3 Power head and driving trailer design	32
D.4 Individual coach design	33
<b>Annex E (informative) Migration rule for this European Standard</b>	<b>35</b>
<b>Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC of the European Parliament and of the Council of 17 June 2008 on the interoperability of the rail system within the Community (Recast)</b>	<b>36</b>
<b>Bibliography</b>	<b>39</b>
<b>Figures</b>	
Figure 1 -- Example for clearance requirement of crumple zones in areas of temporary occupation (e.g. vestibule)	13
Figure 2 -- Driver's seat clearance zone	14
Figure 3 -- Obstacle deflector load application	16
Figure C.1 -- Buffered wagon interface	26
Figure C.2 -- Wagon buffer characteristic	27
Figure C.3 -- Peri-urban tram obstacle	28
Figure C.4 -- Coupler characteristic	28
Figure C.5 -- Deformable obstacle geometry	30
Figure C.6 -- Deformable obstacle stiffness	30
Figure C.7 -- Tram corner collision obstacle	31
Figure D.1 -- Locomotive reference train	32
Figure D.2 -- Power head/driving trailer reference train	33
Figure D.3 -- Coach simplified assessment	34
<b>Tables</b>	
Table 1 -- Crashworthiness design categories of railway vehicles	8
Table 2 -- Collision scenarios and collision obstacles	10
Table 3 -- Obstacle deflector performance requirements	11
Table ZA.1 -- Correspondence between this European Standard, the HS TSI RST published in the OJEU dated 26 March 2008 and Directive 2008/57/EC	37
Table ZA.2 -- Correspondence between this European Standard, the CR LOC and PASS RST TSI (final draft Rev 4.0 dated 24 November 2009) and Directive 2008/57/EC	38
