DIN EN 13979-1:2011-06 (E)

Railway applications - Wheelsets and bogies - Monobloc wheels - Technical approval procedure - Part 1: Forged and rolled wheels (includes Amendment A2:2011)

Contents

Page

1 Scope 6

2 Normative references 6

3 Parameters for the definition of the application covered 6
3.1 Parameters for geometrical interchangeability 6
3.1.1 Functional requirements 6
3.1.2 Assembly requirements 7
3.1.3 Maintenance requirements 7
3.2 Parameters for thermomechanical assessment 7
3.3 Parameters for mechanical assessment 7
3.4 Parameters for acoustic assessment 8

4 Description of the wheel to be approved 8

5 Assessment of the geometrical interchangeability 8

6 Assessment of the thermomechanical behaviour 8
6.1 General procedure 8
6.2 First stage - Braking bench test 9
6.2.1 Test procedure 9
6.2.2 Decision criteria 9
6.3 Second stage - Wheel fracture bench test 10
6.3.1 General 10
6.3.2 Test procedure 10
6.3.3 Decision criterion 10
6.4 Third stage - Field braking test 10
6.4.1 General 10
6.4.2 Test procedure 10
6.4.3 Decision criteria 10

7 Assessment of the mechanical behaviour 11
7.1 General procedure 11
7.2 First stage - Calculation 11
7.2.1 Applied forces 11
7.2.2 Calculation procedure 12
7.2.3 Decision criteria 13
7.3 Second stage - Bench test 13
7.3.1 General 13
7.3.2 Definition of bench loading and of the test procedure 13
7.3.3 Decision criteria 13

8 Assessment of the acoustical behaviour 13
8.1 General procedure 13
8.2 Calculation procedure 14
8.3 Field measurements 14
8.4 Decision criteria 14

9 Technical approval documents 15

Annex A (normative) Assessment of the thermomechanical behaviour 17

A.1 Assessment organigram ... 17
A.2 Braking bench test procedure ... 18
A.2.1 Principle of the test ... 18
A.2.2 Definition of braking ... 18
A.2.3 Method of measuring the decision criteria ... 18
A.2.4 Tests and measurements ... 20
A.2.5 Anomalies ... 21
A.3 Wheel fracture bench test procedure ... 21
A.3.1 Principle of the test ... 21
A.3.2 Definition of drag braking ... 21
A.3.3 Pre-cracking of the rim ... 22
A.3.4 Special measurement methods required for this test ... 22
A.3.5 Tests and measurements ... 22
A.3.6 Anomalies ... 23
A.4 Field braking test procedure ... 23
A.4.1 Principle of the test ... 23
A.4.2 Definition of braking ... 23
A.4.3 Method of measurement of the decision criteria ... 24
A.4.4 Standard test run ... 24
A.4.5 Tests and measurements ... 25
A.4.6 Anomalies ... 26

Annex B (normative) Organigram of the mechanical behaviour assessment ... 27

Annex C (informative) Mechanical behaviour - Finite element code assessment ... 28

Annex D (informative) Mechanical behaviour - Bench loading and test procedure ... 29

D.1 Principle of bench loading and test procedure ... 29
D.2 Definition of loading ... 29
D.2.1 General ... 29
D.2.2 Measurement of the stresses during field tests ... 30
D.3 Fatigue bench test ... 30
D.3.1 Method 1 - Random fatigue test ... 30
D.3.2 Method 2 - Single-stage fatigue test ... 31

Annex E (informative) Assessment of the acoustical behaviour ... 34

E.1 Assessment organigram ... 34
E.2 Calculation procedure ... 35
E.2.1 Preliminary comment ... 35
E.2.2 Calculation of the wheel modal basis ... 35
E.2.3 Selection of the reference track model ... 35
E.2.4 Definition of the calculation parameters ... 35
E.2.5 Power calculation ... 35
E.2.6 Insertion ... 36
E.2.7 Calculations of the decision criteria for acoustical technical approval of the wheel ... 37
E.2.8 Optional calculations ... 37
E.3 Field measurement procedure ... 37
E.3.1 Objective and preliminary remark ... 37
E.3.2 Recommendations for the operating conditions ... 38
E.3.3 Measurement procedure ... 41
E.3.4 Analysis of results ... 43

Annex F (informative) !Drag braking values for interoperability" ... 46

#Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2008/57/EC$ ... 47

Bibliography ... 50
