DIN EN 13231-3:2012-04 (E)

Railway applications - Track - Acceptance of works - Part 3: Acceptance of reprofiling rails in track

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Longitudinal profile 8
4.1 Principle 8
4.2 Measurements required 8
4.3 Acceptance criteria for longitudinal profile 9
4.3.1 General 9
4.3.2 Peak-to-peak value 9

5 Transverse profile 10
5.1 Principle 10
5.2 Measurements required 10
5.3 Acceptance criteria for the transverse profile 11

6 Metal removal 11
6.1 Measurements required 11
6.2 Acceptance criteria for metal removal 12

7 Surface roughness 12

8 Visual appearance: acceptance criteria 12

Annex A (normative) Procedures to verify reference instruments 15

A.1 Longitudinal profile 15
A.1.1 Principle 15
A.1.2 Calibration beam 15
A.1.3 Coordinate Measuring Machine (CMM) 16
A.1.4 Measurement of the calibration beam using the CMM 16
A.1.5 Data analysis 16
A.1.6 Measurement of the calibration beam using the test instrument 16
A.1.7 Data analysis using the test instrument 16
A.1.8 Acceptance criteria for reference instruments 16
A.1.9 Test report 16
A.2 Transverse profile 17
A.2.1 Principle 17
A.2.2 Calibration jig 17
A.2.3 Coordinate measuring machine (CMM) 17
A.2.4 Calibration jig verification 17
A.2.5 Rail measurements using the test instrument 18
A.2.6 Acceptance of test instruments 18
A.2.7 Test report 18

Annex B (normative) Procedures to demonstrate correlation of approved and reference instruments 21

B.1 Longitudinal profile 21
B.1.1 Principle 21
B.1.2 Characteristics of the test sites 21
B.1.3 Measurements required 21
B.1.4 Data analysis 22
B.1.5 Acceptance criteria for approved instruments 22
B.1.6 Test report 23
B.2 Transverse profile 23
B.2.1 Principle 23
B.2.2 Characteristics of the test sites 23
B.2.3 Measurements required 24
B.2.4 Data analysis 24
B.2.5 Acceptance criteria for approved instruments 28
B.2.6 Test report 28

Annex C (normative) Calculation of peak to peak values 29

C.1 Calculation of the percentage of exceedances 29

Annex D (normative) Method of periodic verification 30

D.1 Method of periodic verification of approved instruments 30
D.1.1 Principle 30
D.1.2 Longitudinal profile 30
D.1.3 Static verifications 30
D.1.4 Dynamic verification 31
D.2 Transverse profile 32
D.2.1 Principle 32
D.2.2 Static verifications 32
D.2.3 Dynamic verification 33
D.2.4 Report 34

Annex E (informative) Example of acceptance documentation for rail reprofiling work 37
