

# DIN EN 14587-3:2013-01 (E)

## Railway applications - Track - Flash butt welding of rails - Part 3: Welding in association with crossing construction

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	6
4	Information to be supplied for approval of procedure .....	8
4.1	By the purchaser .....	8
4.2	By the manufacturer .....	8
5	Approval of the manufacturer .....	8
5.1	General .....	8
5.2	Welding procedure .....	8
5.3	Operators .....	9
5.4	Supervision .....	9
5.5	Weld Inspection .....	9
5.6	Equipment .....	9
5.7	Quality assurance .....	9
6	Requirements for the welding process .....	9
6.1	General .....	9
6.2	Workpiece preparation .....	9
6.3	Clamping force .....	10
6.4	Initial burn-off .....	10
6.5	Preheating .....	10
6.6	Final flashing .....	10
6.7	Upsetting .....	10
6.8	Post-weld treatment .....	11
6.8.1	Before unclamping .....	11
6.8.2	After removal from machine .....	11
6.9	Welding parameters .....	11
6.10	Removal of upset and correction of weld alignment .....	11
7	Profile finishing of the weld .....	11
8	Weld geometry and dimensions .....	12
8.1	General .....	12
8.2	Alignment and flatness across the weld .....	12
8.3	Foot dimensions .....	13
9	Weld identification .....	13
10	Procedure approval .....	13
10.1	General .....	13
10.2	Test weld specimen preparation .....	14
10.3	Number of specimens .....	14
10.4	Approval tests .....	14

10.4.1	General .....	14
10.4.2	Weld geometry and dimensions .....	14
10.4.3	Visual inspection .....	14
10.4.4	Surface finish .....	14
10.4.5	Liquid penetrant testing and magnetic particle testing .....	14
10.4.6	Internal soundness .....	15
10.4.7	Bend testing .....	15
10.4.8	Fatigue testing .....	15
10.4.9	Macro-examination .....	15
10.4.10	Micro-examination .....	16
10.4.11	Hardness testing .....	16
10.5	Test result report .....	17
10.6	Validity of approval .....	17
11	Approval of other rail profiles or grades .....	17
11.1	General .....	17
11.2	Sample preparation .....	17
11.3	Approval tests .....	17
11.4	Test result report .....	18
12	Track trials .....	18
12.1	General .....	18
12.2	Track trial test result report .....	18
13	Weld production following procedure approval .....	18
13.1	Weld production .....	18
13.2	Weld parameter monitoring .....	18
13.3	Visual inspections .....	18
13.4	Weld geometry and dimensions .....	19
13.5	Liquid penetrant testing and magnetic particle testing .....	19
13.6	Internal soundness .....	19
13.7	Bend Testing .....	19
13.7.1	General .....	19
13.7.2	Additional test requirements .....	19
13.7.3	Bend test procedure .....	19
13.7.4	Interpretation of results .....	20
13.7.5	Retesting .....	20
13.7.6	Documentation .....	20
Annex A (informative) Example of Flat spot and Bright spot .....		21
Annex B (normative) Bend test requirements .....		22
Annex C (normative) Test weld fracture faces - Recording of defects .....		24
Annex D (normative) Fatigue test method for flash butt welds .....		26
D.1	Scope .....	26
D.2	Test equipment .....	26
D.3	Calibration procedure .....	28
D.3.1	General .....	28
D.3.2	Test piece .....	28
D.3.3	Test piece preparation .....	28
D.3.4	Instrumentation .....	28
D.3.5	Procedure .....	28
D.4	Fatigue test method .....	32
D.4.1	General .....	32
D.4.2	Staircase testing method .....	32
D.4.3	Example of the data analysis of a fatigue strength determination by the staircase method .....	35
D.4.4	Past-the-post testing method .....	35

<b>Annex E (normative) Macro-examination and micro-examination .....</b>	<b>37</b>
<b>E.1 Macro examination .....</b>	<b>37</b>
<b>E.2 Micro examination .....</b>	<b>37</b>
<b>Annex F (normative) Hardness testing .....</b>	<b>39</b>
<b>Annex G (normative) Ultrasonic testing non-austenitic materials .....</b>	<b>40</b>
<b>G.1 Reference line (DAC) generation - Reference block .....</b>	<b>40</b>
<b>G.2 Reference line (DAC) generation and acceptance criteria .....</b>	<b>40</b>
<b>Bibliography .....</b>	<b>42</b>
