DIN EN 16019:2014-06 (E)

Railway applications - Automatic coupler - Performance requirements, specific interface geometry and test method

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Product requirements 6
4.1 Automatic coupler head characteristics 6
4.2 Coupling system positions 8
4.2.1 General 8
4.2.2 Ready-to-couple position 8
4.2.3 Coupled position 8
4.2.4 Uncoupled position 9
4.3 Coupling requirements 9
4.3.1 Mechanical coupling 9
4.3.2 Pneumatic coupling 10
4.4 Uncoupling 11

5 Tests 11
5.1 Type tests 11
5.1.1 General 11
5.1.2 Strength test 11
5.1.3 Dimension test 14
5.1.4 Gathering range test 15
5.2 Routine tests 15
5.2.1 General 15
5.2.2 Visual checks 15
5.2.3 Dimension test 15
5.2.4 Function tests 15

Annex A (normative) Automatic coupler interface 17

Annex B (informative) Gathering range 22

Annex C (informative) Example method of coupler lock play measurement 23

Annex D (normative) Air pipe connections 26

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC 28

Bibliography 30
