5.10.3	Equivalent (mean) deceleration (ae) based on distance .....	15
5.11	Other calculations .....	15
5.11.1	Brake energy .....	15
5.11.2	Required adhesion value for each axle (req,ax) .....	16
5.11.3	Maximum braking power of each brake equipment type .....	16
6	Immobilization brake calculation .....	16
Annex A (normative) Workflow of kinetic calculations .....		17
Annex B (informative) Example of distance and other dynamic calculations .....		19
B.1	General .....	19
B.1.1	Example train formation .....	19
B.1.2	Vehicle and train characteristics .....	20
B.1.2.1	Train mass .....	20
B.1.2.2	Train resistance .....	20
B.1.3	Brake equipment type characteristics .....	20
B.1.3.1	Electrodynamic brake (depending on adhesion) .....	20
B.1.3.1.1	Input values .....	20
B.1.3.1.2	Time characteristic of the electrodynamic brake .....	20
B.1.3.2	Disc brake (depending on adhesion) .....	21
B.1.3.2.1	Input values .....	21
B.1.3.2.2	Time characteristic of the disc brakes .....	21
B.1.3.2.3	Speed characteristic of the disc brakes (f(v)) .....	22
B.1.4	Blending concept .....	22
B.1.5	Initial and operating characteristics .....	22
B.1.5.1	Gradient .....	22
B.1.5.2	Initial speed .....	22
B.1.5.3	Quantity of each brake equipment type available .....	22
B.1.6	Wheel data .....	23
B.2	Calculation results .....	23
B.2.1	Braking force of single brake equipment type related to the entity .....	23
B.2.2	Total braking force per braking equipment type and train resistance .....	24
B.2.3	Stopping distance .....	25
B.2.4	Stopping time .....	26
B.2.5	Resultant equivalent response time .....	26
B.2.6	Equivalent (mean) deceleration based on distance .....	26
B.2.7	Decelerations .....	26
B.2.8	Required adhesion .....	27
