

DIN EN 15654-1:2018-03 (E)

Railway applications - Measurement of vertical forces on wheels and wheelsets - Part 1: On-track measurement sites for vehicles in service

Contents		Page
European foreword		4
Introduction		5
1	Scope	6
2	Normative references	7
3	Terms, definitions, symbols and abbreviations	7
3.1	Terms and definitions	7
3.2	Abbreviations	10
3.3	Symbols	10
4	Measured and derived quantities	11
4.1	Measured quantities	11
4.2	Mandatory derived quantities	11
4.3	Optional derived quantities	11
5	Metrological characteristics	14
5.1	General	14
5.2	Accuracy classes	14
5.3	Measurement and calibration range	16
5.4	Influence quantities	17
5.5	Condition of use	17
6	Technical requirements	17
6.1	Train and vehicle related capability	17
6.2	Environmental	18
6.3	Inputs and Outputs	18
6.4	Descriptive markings	21
6.5	Measuring device specific	22
6.6	Measuring site specific	23
Annex A (informative) Device assessment frame work		24
A.1	Introduction	24
A.2	Type approval test	24
A.3	Initial verification	24
A.4	In-service verification	24
A.5	Adjustment and verification methods	24
Annex B (informative) Measurement site selection criteria		25
B.1	Introduction	25
B.2	Measurement site	25
B.3	Criteria for site selection	26
Annex C (informative) Data exchange format		30
C.1	Introduction	30
C.2	Example 1	30

C.3	Example 2: mandatory values	34
	Annex D (informative) Usage of data and accuracy classes	36
D.1	Introduction	36
D.2	Typical applications	36
	Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC aimed to be covered	39
	Bibliography	41
