DIN EN 16704-1:2017-11 (E)

Railway applications - Track - Safety protection on the track during work - Part 1: Railway risks and common principles for protection of fixed and mobile work sites

Contents

Page

European foreword 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 8

4 Common principles 17
4.1 General 17
4.2 Work done by 3rd party 18

5 Principles of risk assessment 18
5.1 General 18
5.2 Decision about safety measures 19
5.3 Lines with more than one track 20
5.4 Supervision 20
5.5 Documentation 20
5.6 Consideration of human behaviour 20
5.7 Actualization of risk assessment 21
5.8 Remote controlled equipment of the track 21

6 Hierarchy of Safety Measures and parameters for the five railway risks 21
6.1 General 21
6.2 Risk 1 – Personnel being struck by a train or injured due to wind drag on open working track (safety of the worker) 22
6.2.1 General 22
6.2.2 Blocking 23
6.2.3 Warning 24
6.3 Risk 2 – Personnel being struck by a train or injured due to wind drag from a train on adjacent track (safety of the worker) 25
6.3.1 General 25
6.3.2 Blocking) 27
6.3.3 Separation 28
6.3.4 Warning 29
6.3.5 Additional measures 30
6.3.6 Exceptional circumstances 31
6.4 Risk 3 – Personnel being struck by machine or rail vehicle on blocked track (safety of the worker in the work site) 31
6.4.1 Measures 31
6.4.2 Process on the work site 31
6.4.3 Organization 32
6.5 Risk 4 – Machines, material or equipment being struck by a train on the adjacent track (safety of the operation/safety of the worker) 32
6.5.1 General 32
6.5.2 Blocking (of the adjacent track) 33
6.5.3 Separation 33
6.5.4 Warning with influence on train circulation) 34
6.5.5 Additional measures 34

6.6 Risk 5 – Personnel being affected by electric shock/electrocuted (safety of the worker) 34
6.6.1 General 34
6.6.2 Measures for work near fixed electrical equipment 34
6.6.3 Disconnection of power 36
6.6.4 Induction 36
6.6.5 Working procedures 36
6.6.6 Traction returning current in rail 37
6.6.7 Risk by broken overhead line 37
7 Working in tunnels 38
7.1 General 38
7.2 Safety measures for staff working in tunnels 39
8 Designing infrastructure 41
8.1 General 41
8.2 Designing new infrastructure 41
8.3 Designing modifications of the infrastructure 41
9 Safety documentation and information 42
9.1 General 42
9.2 Safety document for planning (safety plan) 42
9.2.1 General requirements 42
9.2.2 Necessary information for the safety document for planning 43
9.3 Safety information for briefing 44
9.3.1 General 44
9.3.2 Content of safety briefing 44
9.3.3 Traceability 45
9.4 Access to and egress from the work site 45
10 Use of personal protective equipment 45
Annex A (normative) Requirements and conditions to manage safety measures 46
A.1 Blocking 46
A.1.1 Conditions/requirements for blocking: 46
A.1.2 Procedure for blocking/de-blocking 46
A.1.2.1 Procedure before starting the work 46
A.1.2.2 Procedure after completion of the work 47
A.2 Separation 47
A.2.1 Risk assessment for installation/de-installation of a barrier 47
A.2.2 Specific requirements/conditions for using barriers as a separation 48
A.2.3 Surveillance of workers (without warning, without barrier) 48
A.2.4 Visual demarcation line 49
A.3 Warning 49
A.3.1 Warning process 49
A.3.2 Hierarchy in warning systems 49
A.3.3 Announcement distance for approaching trains 51
A.3.4 Type of signals 52
A.3.5 Acoustic planning 52

A.3.6 Working with/on (noisy) track working machines: 54
A.3.7 Visual signalling devices 55
A.3.8 Controlling the reaction of workers 55
A.3.9 Specific requirements for LOWS 56
A.3.9.1 General 56
A.3.9.2 Chain of lookouts 56
A.3.9.3 Transmission of the warning by radio 56
A.4 Additional measures 57
Annex B (normative) Parameters in risk assessment 58
Annex C (informative) Matrix of main responsibilities 60
Annex D (informative) Noise levels of machines 65
Annex E (informative) Warning and remembering devices 67
E.1 Collective warning device vs. individual warning device 67
E.2 Combination of acoustic warning and visual signalling devices 67
Annex F (informative) National speed limits for trains approaching work sites 68
Annex G (informative) Functions within the process “warning” 71
Annex H (informative) Model for safety plan on railway risks 73
H.1 General 73
H.2 Safety document for the railway risks 1 to 4 73
H.3 Decision about the safety measures 75
H.3.1 General 75
H.3.2 Decision about the safety measure for the working track (risk 1 and 3) 75
H.3.2.1 Stopping distances machines 75
H.3.2.2 Blocking (hierarchy step 1) 75
H.3.2.3 Warning 76
H.3.3 Decision about the safety measure for the adjacent track (risk 2 and 4) 77
H.3.3.1 Blocking (hierarchy step 1) 77
H.3.3.2 Separation by technical measures 78
H.3.3.3 Warning 78
H.3.3.4 Surveillance of workers without warning 79
H.3.4 Safety measures for access 79
H.3.5 Train circulation, track distance, dangerous zone 79
H.4 Planning of the safety measures 80
H.5 Handing out of the safety document and instructions on the site 82
H.5.1 General 82
H.5.2 Safety supervision 82
H.5.3 Safety execution 82

H.5.4 Contractor / sub-contractor(s) 82

Annex I (informative) Guideline for the decision of blocking the working track in relation to the use of portable equipment 84

Annex J (informative) Process and documentation about disconnection of fixed electrical equipment 86

J.1 Process of the decision about disconnection of fixed electrical equipment 86

J.2 Minimum contents for the documentation of the decision about disconnection of fixed electrical equipment 86

J.2.1 Information by the contractor 86

J.2.2 Nominated person in control of the electrical equipment 87

J.2.3 Documentation of the decision about the disconnection 87

J.3 Documentation of disconnection/reconnection of power for work near fixed electrical equipment 88

J.3.1 General 88

J.3.2 Instructions for the routeing of the document: 88

J.3.3 Notice of working cessation 88

Annex K (informative) Examples for the possibility of intruding into the vicinity zone of the fixed electrical equipment 90

Annex L (informative) Key aspects of relevant EU Directives 91

L.1 Directive 89/391/EEC 91

L.2 Directive 2004/49/EEC 91

L.3 Directive 92/57/EEC 91

Bibliography 92
