European foreword ... 6
Introduction ... 7
1 Scope ... 8
2 Normative references ... 8
3 Terms and definitions ... 9
4 Product definition ... 11
4.1 Chemical composition ... 11
4.1.1 Values to be obtained ... 11
4.1.2 Sampling methods ... 11
4.1.3 Analysis method ... 11
4.2 Mechanical characteristics ... 11
4.2.1 Characteristics from the tensile testing ... 11
4.2.2 Impact resistance characteristics ... 14
4.2.3 Fatigue characteristics ... 16
4.3 Microstructural characteristics ... 18
4.3.1 Values to be obtained ... 18
4.3.2 Position of the test piece ... 18
4.3.3 Test method ... 18
4.4 Material cleanliness ... 18
4.4.1 Micrographic cleanliness ... 18
4.4.2 Internal integrity ... 20
4.5 Ultrasonic permeability ... 20
4.5.1 General ... 20
4.5.2 Level to be obtained ... 20
4.5.3 Test piece ... 20
4.5.4 Test method ... 21
4.6 Residual stresses ... 21
4.6.1 General ... 21
4.6.2 Values to be obtained ... 21
4.6.3 Test piece and measurement point location ... 21
4.6.4 Measurement method ... 22
4.7 Surface characteristics ... 22
4.7.1 Surface finish ... 22
4.7.2 Surface integrity ... 25
4.8 Geometrical and dimensional tolerances ... 26
4.9 Protection against corrosion and mechanical damage ... 31
4.9.1 Final protection ... 31
4.9.2 Temporary protection ... 36
4.10 Marking ... 37
5 Alternative manufacturing process ... 37
6 Product qualification ... 37
7 Conditions of supply of the product ... 37

Annexe A (info rmative) **Sampling of the material from an axle journal overlength** **38**
A.1 Values to be reached **38**
A.2 Sampling method **38**
A.2.1 Overlength with a diameter identical to the journal diameter **38**
A.2.2 Overlength with a diameter greater than the journal diameter **38**
Annexe B (informative) **Test piece drawings** **39**
Annexe C (normative) **Gauge block for measuring ultrasound permeability** **43**
C.1 Gauge block **43**
C.2 Gauge block tolerances **45**
C.3 Steel grade of the gauge block **45**
Annexe D (informative) **Position of measurement zones for ultrasound permeability** **46**
Annexe E (informative) **Residual stress measurement with strain gauges and saw cutting** **47**
Annexe F (informative) **Post-machining shot peening method** **48**
F.1 Shot peening principle **48**
F.2 Requirements **48**
F.2.1 Shot peening product **48**
F.2.2 Hardness **48**
F.2.3 Roughness **48**
F.2.4 Coverage rate **48**
F.2.5 Fatigue limit **48**
F.3 Parameters **49**
F.4 Qualification of the shot-peening process **49**
Annexe G (normative) **Method to determine the impact resistance of the protective coating** **50**
G.1 YES **50**
G.2 Test piece **50**
G.3 Equipment **50**
G.4 Operating procedure **50**
G.5 Expression of results **50**
Annexe H (normative) **Method to determine the chipping resistance of the protective coating** **51**
H.1 YES **51**
H.2 Test piece **51**
H.3 Equipment **51**
H.4 Operating procedure **51**
H.5 Expression of results **51**
Annexe I (normative) **Method to determine the resistance of the coating to specific corrosive products** **53**

I.1 YES **53**
I.2 Test piece **53**
I.3 Equipment **53**
I.4 Corrosive products **53**
I.5 Operating procedure **54**
I.6 Expression of results **54**
Annexe J (normative) **Method to determine the resistance of the protective coating under cyclic mechanical stress** **55**
J.1 Purpose **55**
J.2 YES **55**
J.3 Test piece **55**
J.4 Equipment **55**
J.5 Operating procedure **55**
J.6 Expression of results **56**
Annexe K (normative) **Product qualification** **57**
K.1 Introduction **57**
K.2 General **57**
K.3 Requirements **58**
K.3.1 Requirements to be met by the manufacturer **58**
K.3.1.1 General **58**
K.3.1.2 Quality organisation **58**
K.3.1.3 Staff qualification **58**
K.3.1.4 Equipment **58**
K.3.2 Requirements to be met by the product **58**
K.4 Qualification procedures **59**
K.4.1 General **59**
K.4.2 Documentation required **59**
K.4.3 Evaluation of production facilities and production process **59**
K.4.4 Laboratory tests **60**
K.5 Validity of the qualification **60**
K.5.1 Condition of validity **60**
K.5.2 Modification and extension **60**
K.5.3 Transfer **60**
K.5.4 Expiry **61**
K.5.5 Withdrawal **61**
K.6 Qualification record **61**

Annexe L (normative) **Conditions of supply of the product** **62**
L.1 Introduction **62**
L.2 General **62**
L.3 Delivery state **63**
L.4 Unit checks **63**
L.5 Batch sampling check **63**
L.5.1 Checks to be carried out **63**
L.5.2 Ultrasonic permeability **64**
L.5.3 Surface finish **64**
L.5.4 Visual inspection **65**
L.6 Quality plan **65**
L.6.1 General **65**
L.6.2 Objectives **65**
L.6.3 Quality Plan terms of application **65**
L.7 Permissible repairs **66**
L.7.1 General **66**
L.7.2 Heat treatment **66**
L.7.3 Retesting **66**
L.7.4 Axle straightening **66**
L.7.5 Re-machining **66**
Annexe M (normative) **Measurement of the hydrogen content of steel for axles at the development stage** **67**
M.1 General **67**
M.2 Sampling **67**
M.3 Analysis methods **67**
M.4 Precautions **67**
Annexe ZA (informative) **Relationship between this European Standard and the essential requirements of Directive 2016/797/EC to be fulfilled** **68**
Bibliography **70**
