DIN EN 15746-2:2021-05 (E)

Railway applications - Track - Road-rail machines and associated equipment - Part 2: General safety requirements

Contents

Page

European foreword 6

Introduction 8

1 Scope 10

2 Normative references 11

3 Terms and definitions 16

4 List of significant hazards 17

5 General safety requirements and/or measures 17
5.1 General 17
5.2 Access and egress to and from working places 18
5.2.1 Cabs 18
5.2.2 Working places, places for control and maintenance outside of cabs 19
5.2.3 Walkways on the machine 19
5.3 Ergonomics 19
5.4 Cabs 20
5.4.1 Minimum dimensions in cabs 20
5.4.2 Cab floors 20
5.4.3 Emergency exit 20
5.4.4 Climatic conditions in cab 20
5.4.5 Protection from dust 20
5.4.6 Visibility from cabs and other permanent work places 21
5.4.7 Windows 24
5.4.8 Storage for documents and equipment 25
5.5 Seats 25
5.5.1 Seats for the operator(s) 25
5.5.2 Additional seats 25
5.6 Standing places 25
5.6.1 General 25
5.6.2 Risk of falling 25
5.6.3 Electrical risk from overhead lines 26
5.7 Edges and corners 26
5.8 Pipes and hoses 26
5.9 Communications between work positions 26
5.10 Prevention of derailment 26
5.10.1 General 26
5.10.2 Railhead clearing device - running, travelling and working mode 26
5.11 Stability and measures preventing overturning 26
5.11.1 Stability against overturning in road configuration 26
5.11.2 Stability against overturning in rail configuration 27
5.11.3 Operator protection 27
5.12 Emergency stopping devices 27
5.12.1 Emergency stopping devices for movement of the machine and working equipment 27
5.12.2 Action of emergency stopping devices 27
5.13 Moving parts and materials 28
5.14 Operators' controls and indicators 28
5.14.1 General requirements 28

5.14.2 Control systems 30
5.14.3 Starting system 32
5.14.4 Accidental activation 32
5.14.5 Pedals 32
5.14.6 Protection against uncontrolled motion in working mode 32
5.14.7 Control panels and indicators 32
5.14.8 Remote controls 32
5.15 Thermal hazards 33
5.16 Electrical system 34
5.16.1 Electrical equipment 34
5.16.2 Disconnection devices 34
5.16.3 Working environment 34
5.16.4 Conductors, cables and wiring practices 34
5.16.5 Batteries 34
5.16.6 Overhead contact line systems 35
5.16.7 Equipotential bonding 36
5.16.8 Specific requirements for urban rail machines for working with live overhead contact line systems 36
5.16.9 Antennae 37
5.17 Machine safety requirements related to electromagnetic compatibility 37
5.18 Emission of gas and particles 37
5.19 Pressurized systems 38
5.20 Fuel tanks and hydraulic tanks 38
5.21 Noise 39
5.22 Vibration 39
5.22.1 General 39
5.22.2 Whole body vibration 40
5.22.3 Hand arm vibration 40
5.23 Protection from the risks of fire 40
5.23.1 Fire fighting equipment 40
5.23.2 Material requirements 40
5.23.3 Fire detection devices 41
5.23.4 Fire extinguishing devices 41
5.23.5 Self-rescue devices 41
5.23.6 Built in fire extinguishing system 41
5.24 Braking systems 41
5.24.1 General 41
5.24.2 Special case for machines in running mode 43
5.24.3 Special case for machines on urban rail 43
5.24.4 Holding on gradients 44
5.24.5 Braking of trailing machines/vehicles 44
5.24.6 Continuous service air brake for trailing machines/vehicles 45
5.24.7 Remote application of brakes 45
5.25 Lighting 45
5.25.1 Lighting general 45
5.25.2 Lighting inside the machine 45
5.25.3 Lighting for working places/areas beside the machine 45
5.26 Warning systems 46
5.27 Maintenance 47
5.27.1 General 47
5.27.2 Frequent maintenance 47
5.27.3 Support devices 47
5.27.4 Unauthorized access to the engine compartment 47
5.28 Safe handling 47
5.29 Moveable machine components 47
5.30 Environmental temperature conditions 47
5.31 Storage of substances hazardous to health 48

6 Additional safety requirements or measures for specific machine functions 48
6.1 Conveyors 48
6.2 Cranes and lifting devices fixed on the machine 49
6.3 Transport of loads by machines used for lifting 49

6.4 Elevating work platforms 49
6.5 Rail profiling machines (grinding, milling or planing) 49

7 Verification of the conformity to the requirements and/or particular safety measures 49
7.1 General 49
7.2 Methods of verification 50
7.2.1 General 50
7.2.2 Visual check 50
7.2.3 Measurement 50
7.2.4 Functional test 50
7.2.5 Load test(s) 50
7.2.6 Specific verification/measurements and other controls 50

8 Information for use 50
8.1 General 50
8.2 Instruction handbook 51
8.2.1 Specific information in instruction handbook 51
8.2.2 Restrictions of use 52
8.2.3 Mass of the machine in working condition 53
8.2.4 Stability of the machine 53
8.2.5 Conformance to the lateral limit of work 53
8.2.6 Opening and closing the machine 53
8.2.7 Locking of tools and equipment 53
8.2.8 Devices to prevent access to an operating track 54
8.2.9 Work places situated outside the running gauge 54
8.2.10 Warning systems 54
8.2.11 Testing of warning systems 54
8.2.12 Information for maintenance 54
8.2.13 Trailing loads 55
8.3 Warning signs and written warnings 55
8.4 Marking 55

Annex A (normative) List of significant hazards 57

Annex B (normative) Check list for conformity 60

Annex C (normative) Noise test code (grade of accuracy 2) 66

C.1 Scope 66
C.2 Definitions 66
C.3 Determination of the emission sound pressure level at the working place and other specified positions 66
C.4 Sound power level determination 67
C.5 Installation and mounting conditions 67
C.6 Working conditions 67
C.7 Measurement uncertainties 70
C.8 Information to be recorded 70
C.9 Information to be reported 70
C.10 Declaration and verification of noise emission values 71

Annex D (normative) Vibration test code 75

D.1 Scope 75
D.2 Measurement and degree of uncertainty (K) of whole body vibration (WBV) 75
D.2.1 General 75
D.2.2 WBV Vibration measurement 75
D.2.3 Reporting whole body vibration data 75
D.3 Measurement and degree of uncertainty (K) of hand arm vibration (HAV) 76
D.3.1 General 76
D.3.2 HAV Vibration measurement 76
D.3.3 Reporting hand arm vibration data 76

Annex E (informative) Structure of European Standards for track construction and maintenance machines 77

Annex ZA (informative) Relationship between this European Standard and the essential requirements of EU Directive 2006/42/EC aimed to be covered 79
