

# DIN EN 13749:2021-05 (E)

## Railway applications - Wheelsets and bogies - Method of specifying the structural requirements of bogie frames

---

<b>Contents</b>		<b>Page</b>
European foreword .....		5
1	Scope .....	6
2	Normative references .....	6
3	Terms and definitions .....	6
4	Technical specification .....	8
4.1	Scope .....	8
4.2	General requirements .....	8
4.3	Design load cases .....	8
4.4	Vehicle conditions and interfaces .....	9
4.5	Particular requirements .....	9
5	Verification of the design data .....	9
6	Validation and acceptance of the design .....	9
6.1	General .....	9
6.2	The validation plan .....	10
6.2.1	Content .....	10
6.2.2	Structural analysis .....	11
6.2.3	Static tests .....	12
6.2.4	Fatigue tests .....	12
6.2.5	Track tests .....	13
7	Quality requirements .....	14
Annex A(informative) Symbols and units used in the informative annexes .....		15
A.1	Forces .....	15
A.2	Accelerations .....	16
A.3	Masses .....	16
A.4	Other symbols and units .....	17
A.5	Coordinate system .....	17
A.6	Bogie classification .....	19
Annex B(informative) Load cases .....		20
Annex C(informative) Loads due to bogie running .....		22
C.1	General .....	22
C.2	Examples of loads for bogies of passenger rolling stock - categories B-I and B-II .....	23
C.2.1	Exceptional loads .....	23
C.2.2	Normal service loads .....	24
C.3	Examples of loads for freight bogies with a central pivot and two sidebearers - category B-V .....	24
C.3.1	Bogie types .....	24
C.3.2	Relationship of vertical forces .....	24
C.3.3	Exceptional loads .....	25
C.3.4	Normal service loads .....	26

C.4	Examples of loads for bogies of locomotives (with two bogies) - category B-VII .....	27
C.4.1	Exceptional loads .....	27
C.4.2	Normal service loads .....	28
C.5	Examples of loads for bogies of metro, rapid transit, light rail vehicles and trams - categories B-III and B-IV .....	28
C.5.1	Application .....	28
C.5.2	Load cases .....	28
C.5.3	General expressions for the basic load cases .....	29
<b>Annex D(informative) Loads due to components attached to the bogie frame .....</b>		<b>31</b>
D.1	General .....	31
D.2	Component inertia loads .....	31
D.2.1	Derivation .....	31
D.2.2	Design accelerations for equipment attached to the bogie frame .....	32
D.2.3	Design accelerations for equipment attached to the axlebox .....	32
D.3	Loads resulting from viscous dampers .....	32
D.4	Loads resulting from braking .....	33
D.5	Loads resulting from traction motors .....	33
D.6	Forces applied on anti-roll systems .....	33
<b>Annex E(informative) Analysis methods and acceptance criteria .....</b>		<b>34</b>
E.1	General .....	34
E.2	Loads .....	34
E.3	Analysis and acceptance .....	34
E.4	Structural acceptance criteria .....	34
E.4.1	Principle .....	34
E.4.2	Utilization .....	35
E.4.3	Safety factor .....	35
E.4.4	Material strength .....	36
<b>Annex F(informative) Examples of static test programmes .....</b>		<b>41</b>
F.1	General .....	41
F.2	Static test programme for bogies of passenger rolling stock with body supported directly to the sideframe (categories B-I and B-II) .....	42
F.2.1	Tests under exceptional loads .....	42
F.2.2	Tests under normal service loads .....	42
F.3	Static test programme for bogies with central pivot and two sidebearers (category B-V) ..	44
F.3.1	Bogie types .....	44
F.3.2	Tests under exceptional loads .....	44
F.3.3	Tests under normal service loads .....	44
F.4	Static test programme for bogies of locomotives .....	46
F.5	Static test programme for bogies of light rail vehicles and trams .....	46
F.5.1	General .....	46
F.5.2	Tests under exceptional loads .....	46
F.5.3	Tests under normal service loads .....	47
<b>Annex G(informative) Examples of fatigue test programmes .....</b>		<b>48</b>
G.1	General .....	48
G.2	Fatigue test programme for bogies with the body supported directly on the sideframes (categories B-I and B-II) .....	49
G.3	Fatigue test programme for a freight bogie with a central pivot and two sidebearers (category B-V) .....	52
G.3.1	General .....	52
G.3.2	Vertical loads .....	52
G.3.3	Transverse loads .....	52
G.4	Fatigue test programme for locomotive bogies (category B-VII) .....	54

**G.5 Fatigue test programme for bogies of light rail vehicles and trams (category B-IV) .54**  
**Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2016/797/EU aimed to be covered .....55**

**Bibliography .....57**
