ISO 22074-7:2021 (E)

Railway infrastructure — Rail fastening systems — Part 7: Test method for clamping force and uplift stiffness

Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Symbols

5 Principle

6 Apparatus

7 Test specimens

7.1 Rail support
7.2 Fastening

8 Test procedure (reference method)

8.1 Preparation for test
8.2 Loading and measurement for assemblies incorporating a rail pad
8.3 Loading and measurement for assemblies not incorporating a rail pad
8.4 Determination of uplift stiffness
8.5 Testing with two baseplated fastening assemblies

9 Test procedure (alternative method)

9.1 Preparation for test
9.2 Loading and measurement for assemblies incorporating a rail pad
9.3 Loading and measurement for assemblies not incorporating a rail pad
9.4 Determination of uplift stiffness

10 Test report
