

# DIN EN 15427-2-1:2022-07 (E)

## Railway applications - Wheel/Rail friction management - Part 2-1: Properties and Characteristics - Flange lubricants

---

Contents	Page
European foreword .....	3
Introduction .....	4
1 Scope .....	5
2 Normative references .....	5
3 Terms and definitions .....	6
4 Design requirements .....	8
5 Technical specification and product approval .....	8
5.1 Introduction .....	8
5.2 Product specification .....	8
5.3 Technical file .....	8
6 Control and monitoring of product .....	9
6.1 Manufacturing process .....	9
6.2 Composition of lubricant .....	9
6.3 Routine tests .....	9
6.4 Additional measures .....	9
7 Technical datasheet .....	9
7.1 General .....	9
7.2 Grease-based lubricant characteristics .....	9
7.3 Oil-based lubricant characteristics .....	9
7.4 Solid-based lubricant characteristics .....	9
8 Packaging, labelling and storage .....	10
Annex A (normative) Requirements for lubricants and testing .....	11
Annex B (informative) Water wash-off test .....	21
Annex C (informative) Corrosion test on steel .....	23
Annex D (informative) Behaviour at an elevated temperature - adhesion on steel sheet .....	25
Annex E (informative) Determination of the volatile constituents in greases .....	27
Annex F (informative) Peak forming and droop .....	29
Annex G (informative) Functional test on specific equipment .....	32
Annex H (informative) Solid flange lubricant stick testing and starvation test on twin-disc machine	38
Annex I (informative) Mini Traction Machine creep curve test .....	44
