

# DIN EN 13749:2024-02 (E)

## Railway applications - Wheelsets and bogies - Method of specifying the structural requirements of bogie frames (includes Amendment :2023)

---

| <b>Contents</b>   |  | <b>Page</b> |
|---|--|-------------|
| European foreword .....   |  | 5           |
| 1   | Scope .....  | 5           |
| 2   | Normative references .....   | 6           |
| 3   | Terms and definitions .....  | 6           |
| 4   | Technical specification .....  | 8           |
| 4.1   | Scope .....  | 8           |
| 4.2   | General requirements .....   | 8           |
| 4.3   | Design load cases .....  | 8           |
| 4.4   | Vehicle conditions and interfaces .....  | 9           |
| 4.5   | Particular requirements .....  | 9           |
| 5   | Verification of the design data .....  | 9           |
| 6   | Validation and acceptance of the design .....  | 9           |
| 6.1   | General .....  | 9           |
| 6.2   | The validation plan .....  | 10          |
| 6.2.1   | Content .....  | 10          |
| 6.2.2   | Structural analysis .....  | 11          |
| 6.2.3   | Static tests .....   | 12          |
| 6.2.4   | Fatigue tests .....  | 12          |
| 6.2.5   | Track tests .....  | 13          |
| 7   | Quality requirements .....   | 14          |
| Annex A (informative) Symbols and units used in the informative annexes ..... |  | 15          |
| A.1   | Forces .....   | 15          |
| A.2   | Accelerations .....  | 16          |
| A.3   | Masses .....   | 16          |
| A.4   | Other symbols and units .....  | 17          |
| A.5   | Coordinate system .....  | 17          |
| A.6   | Bogie classification .....   | 19          |
| Annex B (informative) Load cases .....  |  | 20          |
| Annex C (informative) Loads due to bogie running .....                        |  | 22          |
| C.1   | General .....  | 22          |
| C.2   | Examples of loads for bogies of passenger rolling stock - categories B-I and B-II .....            | 23          |
| C.2.1   | Exceptional loads .....  | 23          |
| C.2.2   | Normal service loads .....   | 24          |
| C.3   | Examples of loads for freight bogies with a central pivot and two sidebearers - category B-V ..... | 24          |
| C.3.1   | Bogie types .....  | 24          |
| C.3.2   | Relationship of vertical forces .....  | 24          |
| C.3.3   | Exceptional loads .....  | 25          |
| C.3.4   | Normal service loads .....   | 26          |

|  |   |           |
|--|---|-----------|
| C.4  | Examples of loads for bogies of locomotives (with two bogies) - category B-VII .....  | 27        |
| C.4.1  | Exceptional loads .....   | 27        |
| C.4.2  | Normal service loads .....  | 28        |
| C.5  | Examples of loads for bogies of metro, rapid transit, light rail vehicles and trams - categories B-III and B-IV .....                     | 28        |
| C.5.1  | Application .....   | 28        |
| C.5.2  | Load cases .....  | 28        |
| C.5.3  | General expressions for the basic load cases .....  | 29        |
| <b>Annex D (informative) Loads due to components attached to the bogie frame .....</b> |   | <b>30</b> |
| D.1  | General .....   | 30        |
| D.2  | Component inertia loads .....   | 30        |
| D.2.1  | Derivation .....  | 30        |
| D.2.2  | Design accelerations for equipment attached to the bogie frame .....  | 31        |
| D.2.3  | Design accelerations for equipment attached to the axlebox .....  | 31        |
| D.3  | Loads resulting from viscous dampers .....  | 31        |
| D.4  | Loads resulting from braking .....  | 32        |
| D.5  | Loads resulting from traction motors .....  | 32        |
| D.6  | Forces applied on anti-roll systems .....   | 32        |
| <b>Annex E (informative) Analysis methods and acceptance criteria .....</b>            |   | <b>33</b> |
| E.1  | General .....   | 33        |
| E.2  | Loads .....   | 33        |
| E.3  | Analysis and acceptance .....   | 33        |
| E.4  | Structural acceptance criteria .....  | 33        |
| E.4.1  | Principle .....   | 33        |
| E.4.2  | Utilization .....   | 34        |
| E.4.3  | Safety factor .....   | 34        |
| E.4.4  | Material strength .....   | 35        |
| <b>Annex F (informative) Examples of static test programmes .....</b>                  |   | <b>40</b> |
| F.1  | General .....   | 40        |
| F.2  | Static test programme for bogies of passenger rolling stock with body supported directly to the sideframe (categories B-I and B-II) ..... | 41        |
| F.2.1  | Tests under exceptional loads .....   | 41        |
| F.2.2  | Tests under normal service loads .....  | 41        |
| F.3  | Static test programme for bogies with central pivot and two sidebearers (category B- V) .   | 43        |
| F.3.1  | Bogie types .....   | 43        |
| F.3.2  | Tests under exceptional loads .....   | 43        |
| F.3.3  | Tests under normal service loads .....  | 44        |
| F.4  | Static test programme for bogies of locomotives .....   | 45        |
| F.5  | Static test programme for bogies of light rail vehicles and trams .....   | 45        |
| F.5.1  | General .....   | 45        |
| F.5.2  | Tests under exceptional loads .....   | 45        |
| F.5.3  | Tests under normal service loads .....  | 46        |
| <b>Annex G (informative) Examples of fatigue test programmes .....</b>                 |   | <b>47</b> |
| G.1  | General .....   | 47        |
| G.2  | Fatigue test programme for bogies with the body supported directly on the sideframes (categories B-I and B-II) .....                      | 48        |
| G.3  | Fatigue test programme for a freight bogie with a central pivot and two sidebearers (category B-V) .....                                  | 51        |
| G.3.1  | General .....   | 51        |
| G.3.2  | Vertical loads .....  | 51        |
| G.3.3  | Transverse loads .....  | 51        |
| G.4  | Fatigue test programme for locomotive bogies (category B-VII) .....   | 53        |

**G.5 Fatigue test programme for bogies of light rail vehicles and trams (category B-IV) .53**  
**Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2016/797/EU aimed to be covered ..... 54**

**Bibliography ..... 56**
