DIN EN 16207:2024-05 (E)

Railway applications - Braking - Functional and performance criteria of Magnetic Track Brake systems for use in railway rolling stock

Contents

Page

European foreword 4

1 Scope 5

2 Normative references 5

3 Terms, definitions symbols and abbreviated terms 7
3.1 Terms and definitions 7
3.2 Symbols and abbreviated terms 8

4 Task and purpose of the MTB 9

5 Design requirements 10
5.1 Space envelope to be observed by the MTB 10
5.2 Braking force 11
5.3 Guidance of the activated magnet when applied to the rails 11
5.4 Rest position of the magnet above the rail surface 12
5.5 Magnet elements 12
5.5.1 End pieces 12
5.5.2 Pole shoes 12
5.6 Clearance for wheel lathe machines and wheel skates 12
5.7 Strength requirements 14
5.8 Mechanical fastening of the MTB parts to the bogie 15
5.9 Additional requirements for permanent magnets 15
5.10 Control of the MTB 15

6 Load combinations for component tests 16
6.1 MTB performance considered in the emergency brake performance 16
6.2 MTB performance not considered in the emergency brake performance 17

7 MTB diagnostics 17

8 EMC and interfaces 18
8.1 Compatibility with train detection systems 18
8.2 Bogie components in the area of MTB 18
8.3 EMC-proof in accordance with EN 50121-3-2 18

9 Type and series production tests 18
9.1 Type test 18
9.1.1 General 18
9.1.2 Magnetic test 18
9.1.3 Electric test 19
9.1.4 Thermal test 19
9.1.5 Mechanical test 19
9.1.6 Other tests and proofs 19
9.2 Series production testing 20

10 Vehicle implementation tests 20

Annex A (normative) Design loads (load assumptions) of the MTB 22

A.1 General ... 22
A.2 Rest position ... 22
A.2.1 Load case, explanation ... 22
A.2.2 Acceleration ... 23
A.2.3 Excitation by wheel flats ... 24
A.2.4 Jerk caused by bouncing up of the electromagnetic MTB ... 24
A.3 Working position (brake application position) ... 24
A.3.1 Load case, explanation ... 24
A.3.2 Longitudinal force FB,x resulting from an MTB application ... 25
A.3.3 Aspects for transmission of force ... 25
A.4 Rail brakes ... 27
A.4.1 General ... 27
A.4.2 Load case, explanation ... 27
A.5 FME(C)A ... 28
A.6 Load collective for operational safety proof ... 28
A.7 Load collective for component tests on the example of 10 000 brake applications ... 30
A.8 Test procedure ... 30
A.9 Test result ... 30

Annex B (normative) Measurement of the magnetic attractive force -- Functional test of brake magnets ... 31

B.1 Measurement of the magnetic attractive force of MTB magnets ... 31
B.2 Formation of the mean magnetic attractive force for rigid magnets ... 32
B.3 Formation of the mean magnetic attractive force for articulated magnets ... 32

Annex C (normative) End pieces of MTB ... 34

Annex D (normative) Validation process for new end pieces of MTB ... 37

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of Directive (EU) 2016/797 aimed to be covered ... 40

Bibliography ... 42
