<b>7.4.2</b>	<b>Selection of test sections .....</b>	<b>25</b>
<b>7.4.3</b>	<b>Test speed .....</b>	<b>25</b>
<b>7.4.4</b>	<b>Wheel-rail contact geometry .....</b>	<b>25</b>
<b>7.4.5</b>	<b>Vehicle condition .....</b>	<b>25</b>
<b>7.5</b>	<b>Parameters to be measured .....</b>	<b>26</b>

7.5.1	General .....	26
7.5.2	Location of measuring points .....	26
7.5.3	Filtering .....	26
7.6	Definition of intermediate quantities .....	26
7.6.1	Symbols and indices .....	26
7.6.2	Averaging procedure .....	26
7.6.3	Identification of transition periods .....	27
7.6.4	Intermediate quantities .....	28
7.7	Definition of comfort index PCT .....	30
7.8	Alternative comfort index 'sliding PCT over 3 s' .....	31
7.9	Test report .....	33
8	Comfort on discrete events .....	33
8.1	General .....	33
8.2	Basis of the method .....	34
8.3	Methodology .....	34
8.4	Test conditions .....	34
8.4.1	General .....	34
8.4.2	Selection of test sections .....	34
8.4.3	Test speed .....	35
8.4.4	Wheel-rail contact geometry .....	35
8.4.5	Vehicle condition .....	35
8.5	Parameters to be measured .....	35
8.5.1	General .....	35
8.5.2	Location of measuring points .....	35
8.5.3	Filtering .....	35
8.6	Definition of quantities .....	35
8.6.1	Symbols and indices .....	35
8.6.2	Averaging procedure to obtain the mean value .....	36
8.6.3	Maximum peak to peak value .....	36
8.7	Definition of comfort index PDE .....	37
8.8	Test report .....	37
9	Guide for the interpretation of results .....	37
9.1	General .....	37
9.2	Mean comfort .....	37
9.3	Continuous comfort .....	38
9.4	Comfort on curve transitions .....	39
9.5	Comfort on discrete events .....	39
Annex A (normative) Reference system .....		40
Annex B (normative) Measurement techniques .....		42
B.1	General .....	42
B.2	Measuring equipment .....	42
B.2.1	General .....	42
B.2.2	Transducers and signal amplifiers .....	42
B.2.3	Recording equipment .....	43
B.2.4	Fixing transducers to the floor .....	43
B.3	Seat measuring devices and their applications .....	43
Annex C (normative) Weighting curves .....		46
C.1	General .....	46
C.2	Filter functions .....	47
C.2.1	General .....	47
C.2.2	Band-limiting filter .....	47
C.2.3	Acceleration to velocity transition .....	48
C.2.4	Upward gradient .....	48
C.2.5	Overall frequency weighting .....	48
C.2.6	Reduction of the upper limit of the frequency range in vertical direction .....	48

C.3	Tolerances .....	48
C.4	Diagrams .....	50
<b>Annex D (informative) Specifying the vehicle performance with regard to ride comfort .....</b>		<b>54</b>
D.1	General .....	54
D.2	Knowledge of route for comfort assessment .....	54
D.3	Track condition .....	54
D.4	Specification of vehicle conditions .....	55
D.5	General specification .....	55
<b>Annex E (normative) Vehicle assessment with respect to ride comfort .....</b>		<b>56</b>
E.1	General .....	56
E.2	Track geometric quality .....	56
E.3	Test conditions .....	57
E.3.1	Selection of test sections and test zones .....	57
E.3.2	Test speed .....	57
E.3.3	Wheel-rail contact geometry .....	57
E.3.4	Vehicle condition .....	57
E.4	Acceptable modifications of the methods for the continuous or mean comfort evaluation .....	58
E.5	Test report .....	60
<b>Annex F (informative) Presentation of test report .....</b>		<b>61</b>
F.1	General .....	61
F.2	Aim of test .....	61
F.3	Test performer .....	61
F.4	References .....	61
F.5	Test conditions .....	61
F.5.1	General information .....	61
F.5.2	Vehicle .....	62
F.5.3	Seat (for mean comfort complete method) .....	62
F.5.4	Seat occupant (for mean comfort complete method) .....	62
F.5.5	Track .....	62
F.5.6	Speed profile .....	63
F.5.7	Test configurations .....	63
F.6	Measurements and processing .....	63
F.6.1	Measurements .....	63
F.6.2	Processing .....	63
F.6.3	Deviations .....	63
F.7	Report on mean comfort and continuous comfort .....	63
F.7.1	General .....	63
F.7.2	Time series .....	63
F.7.3	Statistical results .....	64
F.7.4	Comfort evaluation .....	64
F.7.5	Spectral analyses .....	64
F.8	Report on comfort in curve transitions .....	68
F.9	Reporting on comfort on discrete events .....	69
<b>Annex G (informative) Guideline for the application of direct tests .....</b>		<b>71</b>
<b>Annex H (informative) Workflow for calculation of RMS from measured (or simulated) time series of accelerations .....</b>		<b>72</b>
<b>Annex I (informative) Determining quantities .....</b>		<b>73</b>
<b>Annex J (informative) Guidance for the application of simulation .....</b>		<b>75</b>
J.1	General .....	75
J.2	Benefits .....	75

J.3	Applications .....	75
J.4	Accuracy and limitations .....	76
J.5	State of the art for railway ENs .....	76
Annex K (informative) Unit Value for the mean comfort index .....		78
K.1	Unit value definition .....	78
K.2	Simple example .....	78
K.3	Maximum simplification .....	79
K.4	Vehicle orientated simplification .....	80
K.5	Test zone orientated simplification .....	80
K.6	Ride comfort distribution .....	81
K.7	Combination of simplifications .....	81
K.8	Full analysis .....	81
K.9	Applying the NMV comfort index scale .....	81
Bibliography .....		82
