Railway applications - Rolling stock - Interior passive safety

| Contents | Page |
|---|-------------|
| Foreword | iv |
| Introduction | v |
| 1 Scope | 1 |
| 2 Normative references | 1 |
| 3 Terms and definitions | 1 |
| 4 Strategic objectives | 4 |
| 4.1 Road transport comparison..... | 4 |
| 4.2 Rail context..... | 5 |
| 4.3 Structural passive safety..... | 5 |
| 4.4 Minimization of injury..... | 6 |
| 4.5 Interior passive safety principles..... | 6 |
| 4.5.1 General design considerations..... | 6 |
| 4.5.2 Component design..... | 7 |
| 5 Benefits of interior passive safety in train collisions | 7 |
| 6 Examples of rail vehicle interior structural design criteria | 7 |
| 6.1 Global standards for vehicle structural integrity..... | 7 |
| 6.2 Standards for interior equipment..... | 8 |
| 6.3 Material selection for rail vehicle interiors..... | 9 |
| 6.4 Structural energy absorption and collapse: UK practice from GMRT2100..... | 10 |
| 6.5 Secondary impact assessment..... | 10 |
| 6.5.1 Considerations for persons with reduced mobility..... | 10 |
| 6.5.2 Secondary impact principles..... | 11 |
| 6.5.3 Secondary impact review..... | 11 |
| 6.5.4 Secondary impact design scenarios..... | 12 |
| 6.5.5 Containment and compartmentalization..... | 12 |
| 6.5.6 Minor impacts with interior features..... | 13 |
| 6.6 Geometric criteria..... | 13 |
| 6.6.1 Standards with geometric requirements..... | 13 |
| 6.6.2 Geometric principles..... | 13 |
| 6.7 Computer simulations, calculations and testing..... | 14 |
| 6.8 Possible re-use of existing component test results..... | 15 |
| 6.9 Open bay seating..... | 16 |
| Annex A (informative) Interior passive safety experience from UK and US | 17 |
| Annex B (informative) Accident statistics | 33 |
| Annex C (informative) Costs and potential benefits of interior passive safety, based on UK practices | 47 |
| Annex D (informative) Considerations for persons with reduced mobility | 54 |
| Annex E (informative) Example abbreviated injury scale | 57 |
| Bibliography | 58 |
