ISO/TS 18973:2025-04 (E)

Railway infrastructure - Rail fastening systems - Two directional test method for resistance to repeated loading

Contents

Page

Foreword ... **iv**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Symbols ... **1**

5 Principle ... **3**

6 Apparatus ... **4**
6.1 General arrangement ... 4
6.2 Rail ... 4
6.3 Actuator ... 5
6.4 Load application head ... 6
6.5 Displacement measuring instruments ... 6
6.5.1 Calibration procedure ... 6
6.5.2 Calibration requirement ... 6
6.5.3 Fixtures for mounting displacement measuring instruments ... 6
6.6 Force measuring instruments ... 6
6.6.1 Instruments ... 6
6.6.2 Verification of calibration ... 6
6.7 Strain gauges for rail clips ... 6

7 Test specimens ... **6**

8 Test procedure ... **7**
8.1 General ... 7
8.2 Preparation for test ... 7
8.3 Clamping force and uplift stiffness ... 7
8.4 Longitudinal rail restraint ... 7
8.5 Vertical stiffness ... 7
8.6 Lateral stiffness ... 7
8.7 Calculation of test loads and test loading angles ... 8
8.8 Two directional static load test ... 8
8.8.1 Preparation for the static load test ... 8
8.8.2 Loading procedure ... 10
8.8.3 Results required from the static load test ... 11
8.9 Two directional repeated load test ... 12
8.9.1 Preparation for the repeated load test ... 12
8.9.2 Loading conditions of the repeated load test ... 12
8.9.3 Results required from the repeated load test ... 13
8.9.4 Repeat tests ... 13

9 Test report ... **14**

Annex A (normative) **Test method for lateral stiffness** ... **15**

Annex B (informative) **Calculation method of test loads and test loading angles** ... **19**

Bibliography ... **28**
