

ISO 24675-2:2026-04 (E)

Railway applications - Running time calculation for timetabling - Part 2: Distance-speed diagrams and speed curves

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
3.1 General terms.....		1
3.2 Terms related to infrastructure.....		2
3.3 Terms related to rolling stock.....		2
4 Relation between shortest running time and timetabling		3
5 Running time calculation with a speed curve		4
6 Calculation		4
6.1 Basic principles.....		4
6.2 Calculation of a speed curve.....		5
6.3 Calculation of running time with a speed curve.....		6
7 Verification of accuracy of the calculation results		7
Annex A (informative) Examples of distance-speed diagrams		14
Annex B (informative) Calculation procedures for a speed curve		20
