

# DIN EN 15085-3:2008-01 (E)

## Railway applications - Welding of railway vehicles and components - Part 3: Design requirements

---

<b>Contents</b>		<b>Page</b>
Foreword .....		5
Introduction .....		6
1	Scope .....	7
2	Normative references .....	7
3	Terms and definitions .....	8
4	Design requirements .....	8
4.1	General .....	8
4.2	Joint static dimensioning .....	8
4.3	Joint fatigue dimensioning .....	9
4.4	Stress categories and stress factors .....	9
4.5	Safety categories .....	10
4.6	Weld performance classes .....	10
4.7	Weld inspection classes .....	11
4.8	Relationship between stress category, safety category, weld performance class, quality levels for imperfections, inspection class and testing .....	12
5	Quality levels for imperfections .....	13
5.1	General .....	13
5.2	Quality levels for imperfections .....	13
6	Choice of parent metals and welding consumables .....	15
6.1	Choice of parent metals .....	15
6.2	Choice of welding consumables .....	15
7	Weld joint design .....	16
7.1	General .....	16
7.2	Welding in cold formed areas .....	16
7.3	Manufacturing provisions .....	17
7.4	Joint preparation .....	28
Annex A (informative) List of welded joints .....		29
Annex B (informative) Joint preparation of welds .....		30
Annex C (informative) Joint preparation for plug welds .....		38
Annex D (informative) Types of joints in relation to stresses and inspection classes .....		39
Annex E (informative) Welded joint validation chart .....		40
Annex F (normative) Resistance spot welding .....		41
F.1	General .....	41
F.2	Minimum shear pull forces .....	45
Annex G (informative) Determination of safety category for welded joints .....		47

<b>Annex H (informative) Welding of 6000 series aluminium alloy extrusions - Recommendations from the Aljoin project for improved crashworthiness .....</b>	<b>48</b>
<b>Bibliography .....</b>	<b>49</b>
<b>Figures Figure 1 -- Example of box girder with high stress level in the tension flange .....</b>	<b>17</b>
<b>Figure 2 -- Butt joint on parts of dissimilar thickness .....</b>	<b>18</b>
<b>Figure 3 -- Weldability access for plug and slot welds .....</b>	<b>19</b>
<b>Figure 4 -- Dimensions for plug and slot welds .....</b>	<b>19</b>
<b>Figure 5 -- Minimum distance between molten areas .....</b>	<b>20</b>
<b>Figure 6 -- Stiffeners fitted perpendicularly to a longitudinal weld .....</b>	<b>20</b>
<b>Figure 7 -- Filler and drain ports .....</b>	<b>20</b>
<b>Figure 8 -- Design of gusset and stiffener ends .....</b>	<b>21</b>
<b>Figure 9 -- Gusset shape .....</b>	<b>21</b>
<b>Figure 10 -- Weld return .....</b>	<b>22</b>
<b>Figure 11 -- Edge distance for fillet welds .....</b>	<b>22</b>
<b>Figure 12 -- Minimum overlapping distance for overlapping welds .....</b>	<b>23</b>
<b>Figure 13 -- Example of run-on and run-off plates for butt welds .....</b>	<b>23</b>
<b>Figure 14 -- Clamped joints .....</b>	<b>24</b>
<b>Figure 15 -- Mixed assemblies .....</b>	<b>25</b>
<b>Figure 16 -- Corrosion locations .....</b>	<b>25</b>
<b>Figure 17 -- Weld toe improvement .....</b>	<b>26</b>
<b>Figure 18 -- Intermittent welds .....</b>	<b>28</b>
<b>Figure D.1 -- Types of joints in relation to stresses and inspection classes .....</b>	<b>39</b>
<b>Figure F.1 -- Resistance spot welding of angled profiles and plates .....</b>	<b>41</b>
<b>Figure F.2 -- Resistance spot welding of plates, single row .....</b>	<b>42</b>
<b>Figure F.3 -- Resistance spot welding of plates, double row .....</b>	<b>42</b>
<b>Figure F.4 -- Resistance spot welding of plates, double row, offset .....</b>	<b>42</b>
<b>Tables Table 1 -- Stress categories .....</b>	<b>10</b>
<b>Table 2 -- Weld performance classes .....</b>	<b>11</b>
<b>Table 3 -- Correspondence between weld performance classes and inspection classes .....</b>	<b>12</b>
<b>Table 4 -- Relationship between stress category, safety category, weld performance class, quality levels for imperfections, inspection class and testing .....</b>	<b>12</b>
<b>Table 5 -- Quality levels for imperfections for steel related to weld performance class .....</b>	<b>13</b>

<b>Table 6 -- Quality levels for imperfections for aluminium and its alloys related to weld performance class .....</b>	<b>14</b>
<b>Table 7 -- Quality levels for imperfections for laser and electron beam welding for steel related to the weld performance class .....</b>	<b>14</b>
<b>Table 8 -- Quality levels for imperfections for laser and electron beam welding for aluminium and its alloys related to the weld performance class .....</b>	<b>15</b>
<b>Table 9 -- Welding in cold formed areas (for steel) .....</b>	<b>17</b>
<b>Table B.1 -- Joint preparations and throat thicknesses of welds .....</b>	<b>30</b>
<b>Table C.1 -- Joint preparations and throat thicknesses of plug welds .....</b>	<b>38</b>
<b>Table F.1 -- Spot spacing, distance from edge .....</b>	<b>41</b>
<b>Table F.2 -- Quality requirements .....</b>	<b>43</b>
<b>Table F.3 -- Surface quality .....</b>	<b>45</b>
<b>Table F.4 -- Minimum shear pull forces for resistance spot welding joints of steel for weld performance classes CP C1, CP C2 and CP C3 .....</b>	<b>46</b>
<b>Table F.5 -- Minimum shear pull force for resistance spot welding joints of aluminium and alloys for the weld performance classes CP C1, CP C2 and CP C3 .....</b>	<b>46</b>
