DIN 1835-2:2024-03 (E)

Cylindrical shanks made of steel for machining tools - Part 2: Connection dimensions for tool holders, accessories

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Connection dimensions 5
4.1 General 5
4.2 Tool holders for type B and type HB flatted cylindrical shanks 5
4.3 Tool holders for type E and type HE cylindrical shanks with inclined clamping surface 7

5 Clamp screws 8
5.1 Dimensions and tolerances 8
5.2 Material 9
5.3 Design 9

Bibliography 10

Figures

Figure 1 — For single-flatted cylindrical shanks, for diameters d_1 = 6 mm to 20 mm 5

Figure 2 — For double-flatted cylindrical shanks, for diameters d_1 = 25 mm to 63 mm 6

Figure 3 — For cylindrical shanks with inclined clamping surface, for diameters d_1 = 6 mm to 20 mm 7

Figure 4 — For cylindrical shanks with inclined clamping surface, for diameters d_1 = 25 mm and 32 mm 7

Figure 5 — Clamp screw 8

Tables

Table 1 — Connection dimensions for type B and type HB 6

Table 2 — Connection dimensions for type E and type HE 8

Table 3 — Dimensions of clamp screws 9
