

DIN EN ISO 945-1:2010-09 (E)

Microstructure of cast irons - Part 1: Graphite classification by visual analysis (ISO 945-1:2008 + Cor. 1:2010) (in cludes Corrigendum AC:2010)

Contents		Page
Introduction		4
1	Scope	5
2	General	5
2.1	Designation system for classifying graphite in cast irons	5
2.2	Visual classification of graphite	13
3	Sampling and preparation of samples	14
3.1	Samples taken from a casting	14
3.2	Sample preparation	14
4	Procedure for graphite classification	14
4.1	Procedure for visual classification of graphite	14
4.2	Evaluation of the analysis results	14
5	Reference images	15
5.1	General	15
5.2	Reference images for graphite form	15
5.3	Reference images for the distribution of graphite (form I)	15
5.4	Reference images for graphite size	15
6	Designation of graphite by form, distribution and size	15
6.1	Designation system	15
6.2	Designation of intermediate graphite sizes	16
6.3	Designation of mixed graphite forms, distributions and sizes	16
6.4	Nodule count	17
7	Report	17
Annex A (informative) Typical graphite forms in cast-iron materials (Examples of photomicrographs)		19
Annex B (informative) Distribution of flake (lamellar) graphite (form I) (Examples of photomicrographs)		20
Annex C (informative) Common terminology and main occurrences concerning graphite in cast irons		21
Bibliography		23
